# wherever you ride

A fast ascent into the mountains. An off-road training session. A ride in the middle of street traffic. Or a competition demanding your best performance. A uvex helmet is always your perfect companion: cool design, innovative technologies and unbeatable protection. When you decide on a uvex, you make the right choice – 365 days a year. Round the clock. On all your routes.

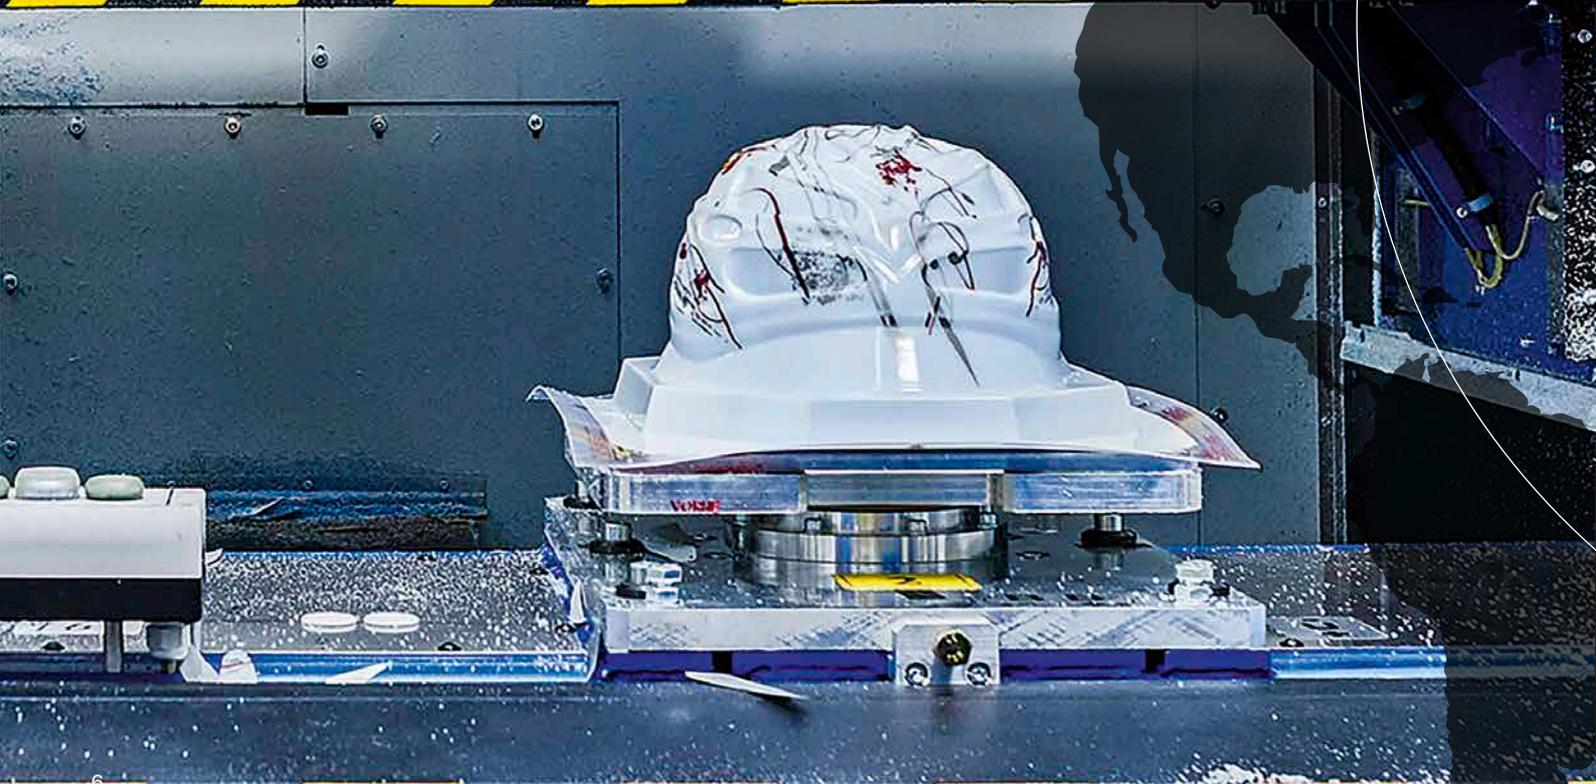

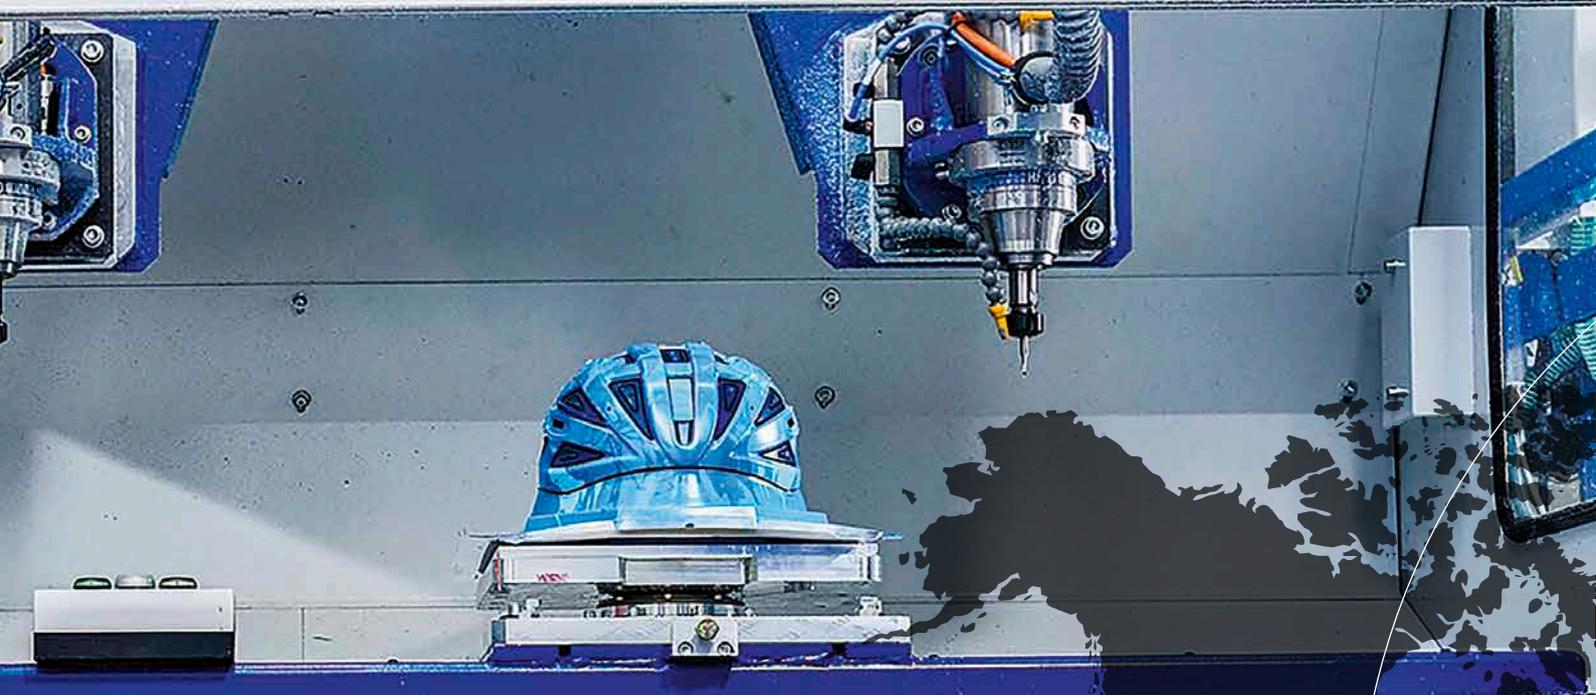

**uvex**

**protecting people  
since 1926**

**Professional or recreational.  
Competition or fun. As one  
of the leading international  
manufacturers of protective  
products with headquarters  
in Fuerth, we at uvex inspire  
our customers every day with  
groundbreaking technologies  
and innovative products.  
24/7 – for almost 100 years.  
To achieve the best, whether  
in leisure, sports or work.  
To protect people.**

# made in germany. made for you.

In a globally competitive world, we have made a deliberate choice to produce many of our helmets in Germany. That is where we research new technologies, develop innovative solutions from them, and use top-quality materials in production. We also place great emphasis on hand-crafted products to guarantee the highest quality down to the last detail.

In our German locations, we have almost 630 staff who know that “made in Germany” is a synonym for quality around the world. With passion and a great sense of responsibility, they’re committed to the outstanding safety standards of our helmets. Because they believe in them.

## What’s in it for you as a uvex partner?

Our commitment to focusing on every detail during development and production.

The best possible availability of our products as we have our own manufacturing facilities in Europe.

As your supplier, we ensure the best working conditions for staff as well as sustainable business practices.

You have our word that we give our all every day to provide you with top-flight products and services and to strengthen our partnership with you.

# work hard. have fun. kick ass...

...is the clear message from **Laura Philipp**. And it's a perfect fit for this tough woman. She's won the Ironman 17 times. She achieved a world record rating of 8:18:20 h. And was Ironman European Champion in 2022. It goes without saying that Laura Philipp is one of the best triathletes in the world. She demands the absolute maximum of herself and her equipment. That's why she counts on uvex products. She wants to focus on her race – with no compromises.

#proudtoprotect

# pushing the limits.

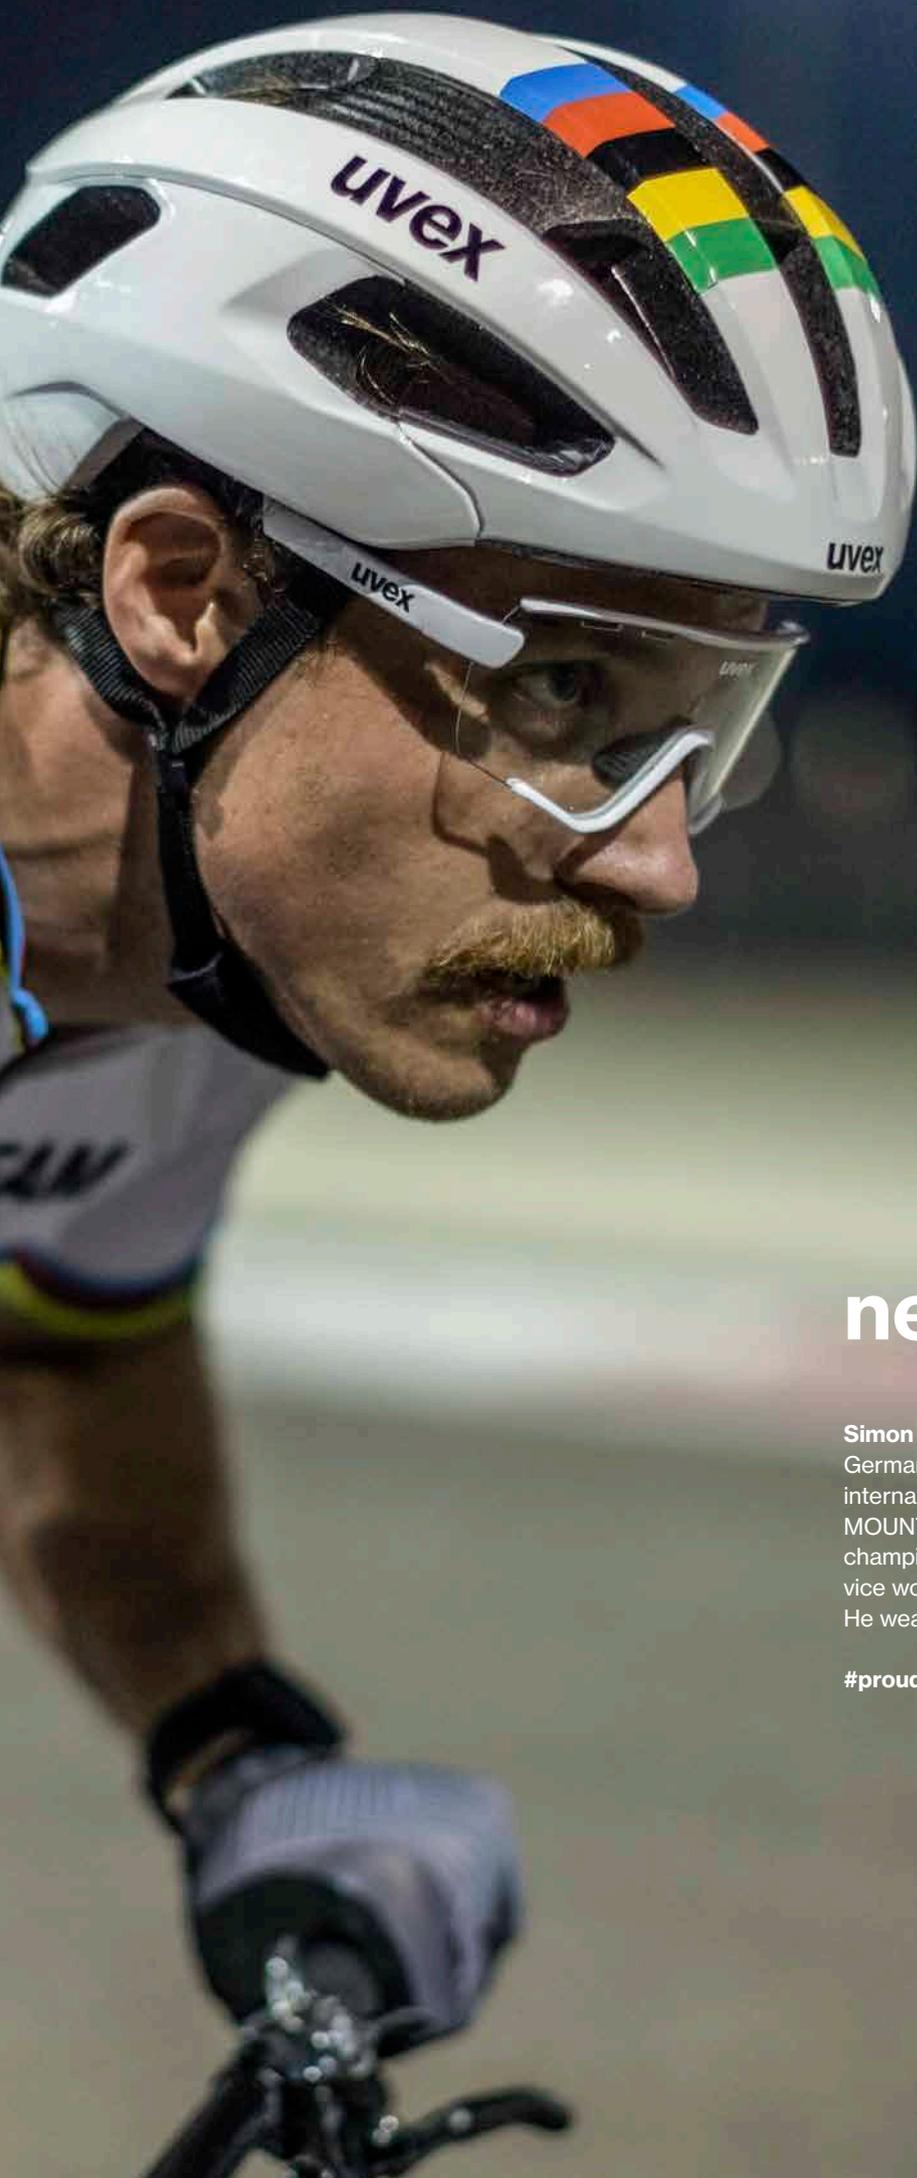

**Marion Fromberger** specialises in short distances. She rides for the German MOUNTAINBIKE RACINGTEAM and is at home on cross-country trails. Wins world cup races. Won the European championship in 2020 and has been second in the overall world cup rankings for Short Track XCC since 2021. That involves a lot of tough training and passion. Her protection? A uvex helmet.

#proudtoprotect

## never not riding.

**Simon Gegenheimer** is a stand-out athlete. He's been German champion in MTB XCE four times since 2012. And internationally too – as a successful member of the German MOUNTAINBIKE RACINGTEAM. He won the MTB world championships as the first Eliminator XCE in 2021 and was vice world champion in 2016, 2017 and 2020. No wonder. He wears uvex helmets and uvex eyewear.

**#proudtoprotect**

# colors and trends

Performance. Statement.

Style. This is your look.

With a passion for color and  
boundless potential.

# sunbee

The new sunshine yellow for a perfect ride. The color? Warm.  
The look? Pretty cool. Fun and gets you noticed.

# More protection with MIPS.

## A comprehensive safety system. Perfect fit included.

If you fall, a glancing impact to your head can result in a forceful rotational movement of the brain. MIPS, the Multi-Directional Impact Protection System, effectively guards against this and is available in a variety of uvex bike helmets.

**Mips**

**TOC  
SEN**

## **If you fall, you're not alone. Tocsen keeps you safe – and gets fast help in an emergency.**

No-one around to help? Tocsen technology calls the professionals in an emergency. Its precision sensor detects falls – and can save lives. If Tocsen gets no response from the rider, it automatically alerts the emergency services and sends them the GPS data. The alarm call is also sent to the growing Tocsen community. Any potential helpers nearby are alerted

by the app and can go directly to the accident site to give first aid. The smart safety system fits any helmet perfectly and is ready to use immediately. With the uvex quatro integrale, uvex rise cc and uvex finale 2.0 helmets, the Tocsen sensor is integrated as standard.

# Easy to see. And easy on the eye.

Want more safety in the city or countryside in twilight, diffuse light or darkness? LED technology from uvex ensures you have a safe ride. Choose the integrated LED strip on the uvex finale light, or our smart, USB-chargeable rear lights that deliver great battery performance.

With the uvex urban planet city helmet shown here, you can see how it works. Along with reflective straps and print, the LED plug-in ensures maximum visibility. With style.

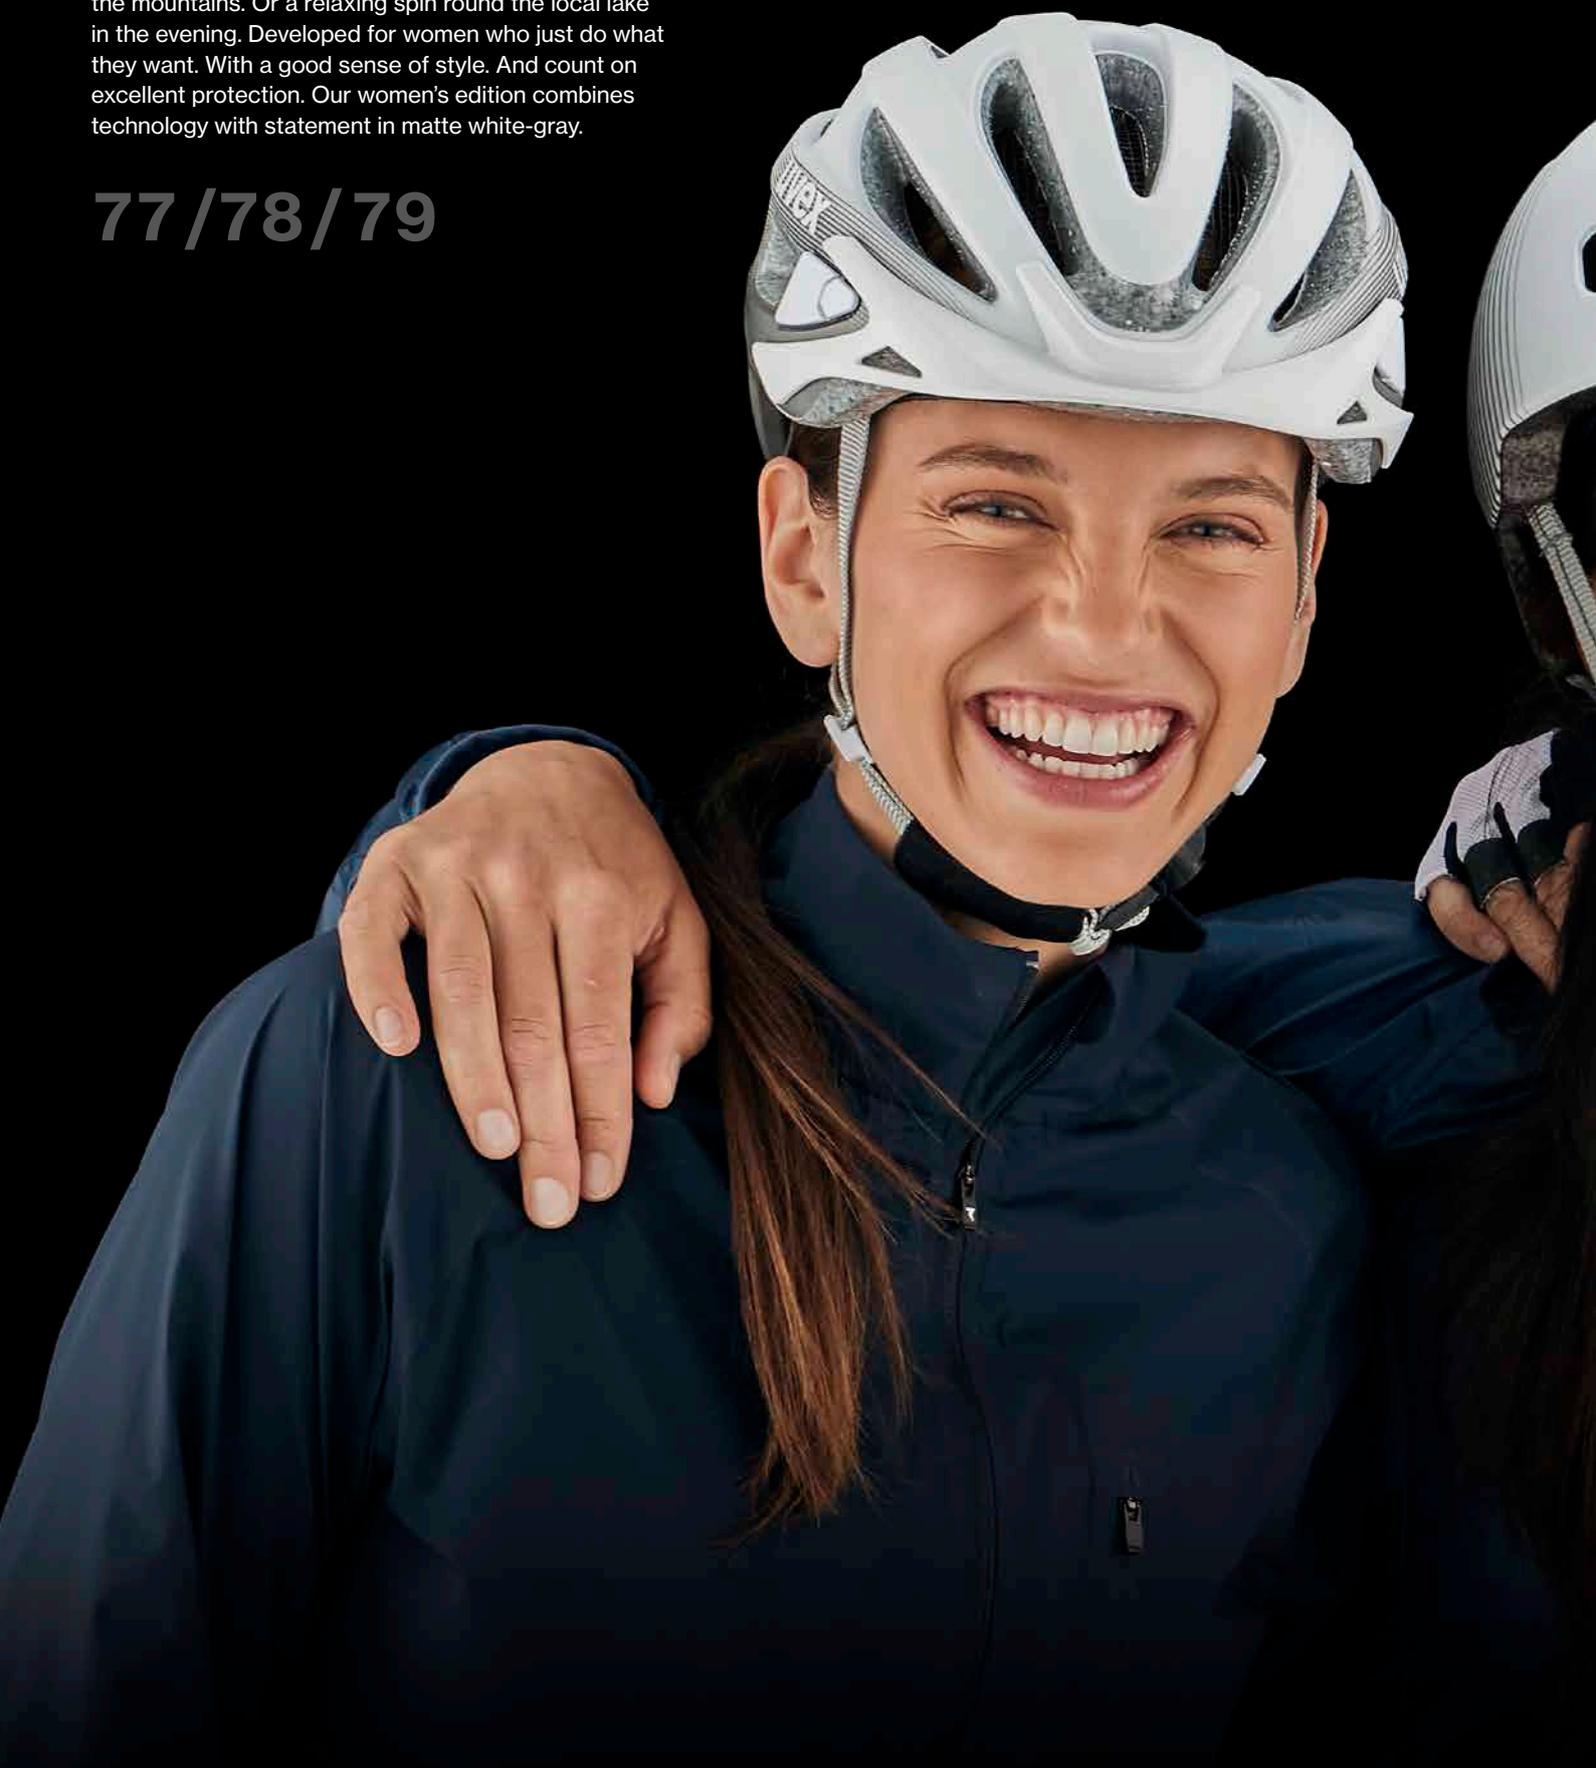

# women's edition

## Choose your style.

For business in the city. Narrow roads snaking through the mountains. Or a relaxing spin round the local lake in the evening. Developed for women who just do what they want. With a good sense of style. And count on excellent protection. Our women's edition combines technology with statement in matte white-gray.

77/78/79

wherever **(WE)** ride

# performance helmets

For fast streets, hairpin bends, or rugged and gravelly pathways. With the uvex Performance Collection, you'll deliver your absolute best from the first yard to the last. With outstandingly good protection.

# city helmets

Day or night. E-bike, city bike or fixie. Out for a relaxing spin or on your way to work. Chain on the right or stop-and-go. Whatever you choose, uvex city helmets get you through the city – safely and in style.

Brand new, different and sustainable:  
the uvex urban planet.

**#ridesustylable**

# protecting people protecting planet

For almost 100 years, we've been developing, making and selling products that protect people in their sport, leisure and work activities. And anyone who protects people needs to protect their environment too. That's why we take good care to ensure that the entire value chain – from the product idea and development through to manufacturing and sales – stays in our hands. In our own state-of-the-art factories, mostly in Germany and elsewhere in Europe. Ecologically and economically astute, ensuring fair working conditions and happy staff – that's what we're about. We call it: made in uvex. The result: smart and sustainable products that we develop using innovative materials that are uncompromisingly effective in form and function.

The new city helmet, uvex urban planet, is a good example. Made in Germany, in our own factory and using sustainable materials. Plus: optimal protection and an uncompromisingly great look.

#sustainablesexiness

## Tested to standards

Anyone riding with uvex bike helmets rides on the safe side. Because every one of our bike helmets undergoes tough tests in the uvex testing center.

Additionally GS-tested

The voluntary test mark "GS" stands for "Geprüfte Sicherheit" ("tested safety").  
Find details about test criteria: [www.tuv.com](http://www.tuv.com)

European cycling helmet standard

**EN 1078:2012+A1 2012** **CE**

---

## Shell materials

### PC

**inmould // double inmould // multi-inmould**

Safety thanks to the strongly bonded PC shell. Double inmould for extra protection along the lower edge.

### ABS

**hardshell**

Proven technology has a hard shell for highly effective protection.

### EPS

**hardshell // inmould**

Protective material made from microscopically small air cells that absorb the force of an impact.

---

## Shell constructions

### Hardshell

The helmet has a molded outer shell and EPS inner shell for the most efficient safety combination: impact resistant on the outside, shock-absorbing on

the inside. This complex construction allows perfectly placed air vents and channels to be built in, for exceptional wearing comfort.

### Inmould

The protective EPS is injected directly into the polycarbonate shell. This ensures a lightweight helmet construction with the highest impact resistance and perfect bonding between the EPS inner layer and the PC outer layer.

### Double inmould // multi-inmould

The proven inmould construction is fitted with a second or several PC shell(s). It gives extra protection to the outer edge from damage.

---

## Fit

### Shell sizes

Perfect fit = head size and head shape. The uvex range has the perfect shell size for every head, whether large, small, round or angular, from 45 cm to 65 cm.

### Monomatic

The uvex monomatic comfort fastener can be opened and closed with just one hand.

### MIPS

An angled impact generates rotational movements that can cause serious injuries. The MIPS system can reduce the rotational movements and thus reduce the risk of brain damage.

### MIPS + height adjustment

The added height adjustment into the MIPS layer provides even more safety and comfort.

### FAS

Fast Adapting System straps can be easily and continuously tailored to fit your precise head shape.

### Tocsen

The unique system, comprising the innovative crash sensor and the Tocsen app, detects a fall, asks how you're doing and makes an emergency call including GPS location data, if there is no response.

---

## Comfort

### Lining

#### Basic pads

Removable and washable padding.

#### Functional pads

High-quality, moisture-absorbing functional material without anti-bacterial treatment.

#### Vent pads

High-quality moisture-wicking material with embossed ventilation openings. Comfortable and soft on the skin, quick-drying, removable, and washable.

#### X-fit pads

High-quality, structured material for improved ventilation. Removable, washable padding.

### Vent systems

uvex places the highest value on optimal ventilation. Cleverly designed ventilation openings draw fresh air in and expel warm air.
