wherever you ride

Spending a perfect day carving the slopes, on powder snow or icy pistes? Speeding down or panting your way back up? A ski helmet and ski goggles from uvex are your most loyal companions. Outstanding design, innovative technologies and unbeatable protection.

The uvex logo is displayed in a bold, white, sans-serif font. The background of the entire page is a dark, moody photograph of a beach at night, with sand in the foreground and a dark, textured surface in the background.

uvex

**protecting people
since 1926**

**Professional or recreational.
Competition or fun. As one
of the leading international
manufacturers of protective
products with headquarters
in Fuerth we at uvex inspire
our customers every day with
groundbreaking technologies
and innovative products.
24/7 – for more than 90 years.
To achieve the best, whether
in leisure, sports or work.
To protect people.**

when there's no room for compromise

Dominik Paris (IT), winner of the alpine world cup and world championship several times over, demands as much from his equipment as he does from himself: everything. That's why he chooses uvex helmets and goggles.

#proudtoprotect

when you've achieved the impossible

Winning the world cup with her uvex ski helmet and ski goggles:
Katharina Liensberger (AT) competing in the final of the
slalom race at the Alpine World Cup in Lenzerheide 2021.

#proudtoprotect

whatever the conditions

Slalom world cup 2021 in Kranjska Gora (SLO). An icy, technically demanding piste complicated by heavy snowfall. And by ambitious competitors. On the podium? Three athletes who chose uvex helmets and ski goggles: **Clement Noel (FRA), Victor Muffat-Jeandet (FRA), Ramon Zenhäusern (SUI).**

Photo: **Ramon Zenhäusern with his uvex downhill** – for ultimate contrast enhancement and uvex supravision® anti-fog technology that delivers great performance in all conditions.

#proudtoprotect

speed. skill. victory.

Pure performance in our exclusive collection for pro athletes.

Innovative technologies and materials dedicated to elite-level sport, along with superlative design. Plus: breathtaking finishes in matte gold and a gold-silver gradient. Always included: unique protection with functions that champion skiers have relied on for decades.

uvex JAKK+ sl chrome*

Give your all in the slalom – knowing you have the best protection. Experience the optimal combination: an extremely light, shock-resistant thermoplastic outer shell with a shock-absorbent inner layer.

uvex race 3 carbon chrome*

Our racing helmet made of top-quality and ultra-light carbon fiber gives ski racers perfect protection and outstanding aerodynamics.

* Interested in these helmets? Please contact your retailer.

uvex athletic CV chrome

An angular and ultra-sporty helmet design with perfect fit. Plus: uvex colorvision® and uvex supravision® for ultimate contrast enhancement and an outstanding anti-fog effect.

59

uvex downhill 2100 CV chrome

Extra-wide field of vision, spherical lens, uvex supravision® anti-fog coating and uvex colorvision®. In short: maximum performance on the piste and on powder.

58

uvex contest CV chrome

Developed together with world cup athletes and embellished with a matte gold finish that gets you noticed. The extra-wide field of vision, decentered lenses and outstanding anti-fog coating are all world-class.

58

lens tech

Everything in view – whatever the conditions.

The uvex brand's DNA is embedded in our ski goggles – especially our leading lens technologies. All made possible by our inhouse engineering and our own production facilities. uvex colorvision® delivers ultimate contrast and maximum color perception – even when visibility is very poor. The self-tinting uvex variomatic® lenses adapt from light to dark in a few seconds – as soon as the light conditions change. Ski goggles with uvex polavision® give you reliable protection from glare and reflections that can affect your visibility on the mountain. The uvex supravision® coating technology, available for all uvex ski goggles, ensures you have fog-free and accurate vision.

#whatevertheconditions

uvex colorvision®: wow effect included

- Ultimate contrast enhancement
- 400% more anti-fog vs. standard
- 15% larger field of vision

uvex polavision®: less glare, more joy

- Fewer distracting reflections
- Minimized glare reduces eye strain
- Better detail vision, even in difficult light conditions

uvex variomatic®:
top-flight comfort

- Automatic, stepless self-tinting
- Three protection levels in one product (S1-S3)
- From light to dark in 25 seconds

uvex supravision®:
unequaled anti-fog performance

- 200% more anti-fog (vs. standard)
- 100% UVA, UVB, UVC protection up to 400nm
- Unbreakable for maximum protection

protecting people protecting planet

For over 90 years, we've been developing, making and selling products that protect people in their sport, leisure and work activities. And anyone who protects people needs to protect their environment too.

That's why we take good care to ensure that the entire value chain – from the product idea and development through to manufacturing and sales – stays in our hands. In our own state-of-the-art factories, mostly in Germany and elsewhere in Europe.

Ecologically and economically astute, ensuring fair working conditions and happy staff – that's what we're about. We call it: made in uvex. The result: smart and sustainable products that we develop using innovative materials that are uncompromisingly effective in form and function. Such as our new uvex downhill 2100 CV planet ski goggles on page:

62

We have developed a label concept to cover our wide range of sustainability initiatives. It includes a detailed description of the uvex group's projects.

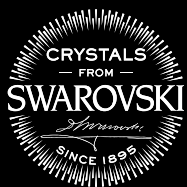

uvex colorvision

women's edition choose your style

wherever (WE) ride

The fresh smell of icy winter air and the crunch of snow under your shoes. It's time to get outside and celebrate the snow. Whether you're a speed freak, a freerider in the park or a pro on the curves – you'll love the women's edition. Top technology that really makes a statement. Made for women who do exactly what they want. Show off their style. And insist on the best protection.

32/41/61

colours & trends

Stand-out style.

**Get the latest colors
in perfectly coordinated
helmet and goggle
combos. Made for people
who love style with
a strong statement.**

fierce red

All eyes on you. Passionate. Wild. Demanding. And adventurous. fierce red is guaranteed to get you noticed. The perfect pop of color for monochrome outfits or sassy color blocking. Shows you've got character. Everyone else will see red.

made for pros.

Progressive design, proactive protection and professional performance. Meet the new uvex invictus.

Whether you're a pro or simply a speed addict – the uvex invictus gives you safety and race performance on the highest level. With its innovative features and uvex +technology, this aerodynamic, high-end helmet sets new safety standards on the piste. If you take a tumble, the optional, height-adjustable chin guard with a breakaway function, along with the integrated MIPS system, steers the impact force away from your head. Innovative, rescue-optimized cheek pads ensure that your helmet can be quickly and easily removed in an emergency. Plus: the special structure of the outer shell makes it even more shock-resistant with 15% less weight. And optimal ventilation ensures perfect temperature regulation in all weathers. In short: the uvex invictus is the ideal allrounder across any discipline.

27

Functional features:

uvex downhill 2100 CV planet: sustainability on every level.

Scratch-resistant coating and
full Revo mirroring

- Ultimate contrast with
uvex colorvision®
- Bio-based PA
- 15% wider field of vision
(single lens technology)
- 100% UVA, UVB & UVC
protection up to 400nm

400% more anti-fog with
uvex supravision®

Bio-based TPU frame
with water-based varnish

Temperature-regulating membrane
in recycled yarn

Meet the revolutionary, sustainable reissue of one of the world's best-selling ski goggles – and the launch of our planet series. We're extending our "protecting people" mission with the "protecting planet" pledge. As a brand that works every day with innovative safety and vision technologies, we'll never close our eyes to the challenges of the

future. That's what gave us the idea of producing our outstanding and highly functional ski goggles – the uvex downhill 2100 CV – using sustainability principles but without compromising on design, function and protection. And we're proud of the result. The uvex downhill 2100 CV planet is among the most sustainable goggles you can find on the piste today.

uvex speedy pro

Love at first sight.
People never forget their first uvex ski goggles. Features lasergold tinting for optimal protection and high-contrast vision.

Features

- 100% UVA, UVB and UVC protection up to 400 nm
- uvex supravision® technology
- Single lens (cylindrical)
- Foam membrane
- Foam layer
- Goggle strap
- Easy to clean

tech summary

helmets

Tested for safety

Ski helmet standard
EN 1077:2007

Mountaineering helmet standard
EN 12492:2012

Bicycle helmet standards
EN 1078:2012 + A1:2012

Also GS tested

The voluntary certification mark "GS" stands for "Geprüfte Sicherheit" ("tested safety"). More details on the test criteria are available at: www.uvex-sports.com/ce

Shell technologies

hardshell

A highly effective combination of an injection-molded outer shell and an EPS inner shell, making it:

- Robust
- Highly impact-resistant
- Shock-absorbent
- Insulated against cold

inmould

The EPS is injected directly into the polycarbonate shell to make it:

- Light
- Impact-resistant

hybrid-technologie

The robust hardshell on the upper part of the helmet is bonded to the lower part using the Inmould process for:

- Perfect ventilation
- Impact resistance
- Optimal fusion of the hardshell and inmould technology

+technologie

Innovative and very light special polymer.

Shell material

Polycarbonate

inmould

Protective as the PC layer is firmly bonded to the EPS layer

CFK

hardshell

Polymer reinforced with carbon fiber used in high-end and lightweight helmets

ABS

hardshell

Ultra-effective protection and maximum robustness

EPS

hardshell // inmould // hybrid

Protective material comprising microscopically small air cells that absorb the force of an impact

Protective systems

MIPS

The Multi-Directional Impact Protection System (MIPS) protects the brain against rotational movements that can be very dangerous in case of an impact to the head.

TOCSEN SENSOR

The innovative Tocsen system comprises a crash sensor and app that detect a fall. Tocsen asks how the wearer is and if they don't respond, it automatically makes an emergency call with GPS location data to the person's emergency contacts and the Tocsen community.

tech summary

goggles

Lens technology

uvex supravision®

The core uvex supravision® technology ensures up to 60 seconds fog-free vision in test conditions. For precise visibility and maximum safety.

uvex variomatic®

The uvex variomatic® lens technology provides automatic lens tinting in any lighting conditions. Available with all uvex goggles, these lenses offer 100% protection against UVA, UVB and UVC rays.

uvex colorvision®

The tinted uvex colorvision® lenses provide maximum contrast enhancement and 400% more anti-fog protection (vs. standard).

uvex polavision®

Reliable protection against glare and reflections: uvex polavision® lenses absorb diffuse light and protect the eyes – even under demanding conditions.

Ski goggle protection

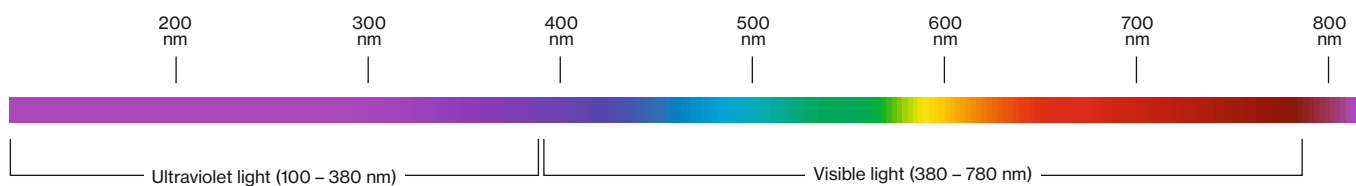

Crack-resistant

NORM: EN 174:2001

uvex goggles undergo a demanding impact test that involves shooting a steel ball, measuring 6mm and weighing 0.86g, against the lens at a speed of 45m/s (162 km/h).

Scratch-resistant

Ultra-robust polycarbonate lenses resist temperatures as low as -40°C without compromising their strength. A special coating protects them from scratches.

100% UV protection up to 400 nm

Our UV absorber offers 100% protection against damaging UV rays up to 400 nm.
