wherever you ride

A showjumping training session requiring all your concentration. An evening ride with friends in the woods. Or racing at full gallop over the fields. A riding helmet and riding gloves from uvex are always your best companions. Excellent design, innovative technologies and unbeatable safety. Choose uvex and you've made the right decision – for the best protection. 24/7/365. And on any terrain.

The background of the advertisement is a dark, atmospheric photograph of a roller coaster. A car is visible at the very top of a steep drop, about to plunge. The scene is set against a twilight sky with some clouds. The overall mood is one of excitement and thrill, which is the context for the protective gear being advertised.

uvex

**protecting people
since 1926**

**Professional or recreational.
Competition or fun. As one
of the leading international
manufacturers of protective
products with headquarters
in Fuerth we at uvex inspire
our customers every day with
groundbreaking technologies
and innovative products.
24/7 – for more than 90 years.
To achieve the best, whether
in leisure, sports or work.
To protect people.**

when you've achieved the impossible

Ingrid Klimke made an impressive return from her injury break at the European Eventing Championship 2021 in Avenches. The multiple Olympic champion, world champion and exceptional athlete came first in both dressage and eventing. Her commitment to equestrian sport and partnership with her horses is legendary – just like her very high standards. That's why her riding helmet, gloves and sunglasses are from uvex.

#proudtoprotect

reltsport.ch

when there's no room for compromise

The outstanding show jumper **Martin Fuchs**. Here he's with Clooney at the World Equestrian Games 2018 in Tryon. He's vice world champion, European champion, and a top sportsman with cult status. He's continuing his successes with other horses too. His one prerequisite: trust. In his horse, his team, his own capabilities, and his uvex equipment.

#proudtoprotect

when your performance brings you to the top

The show jumper **André Thieme** at the European championship 2021 in Riesenbeck. Fierce competition and a demanding course. Breathless silence, perfect ride, explosion of joy. The new European champion, Olympic contender and winner of many major prizes is back at the top. Naturally with his uvex helmet and uvex riding gloves.

#proudtoprotect

Easy to see. And easy on the eye. Even in the dark. The first uvex riding helmet with lights.

More safety in twilight or bad lighting conditions. Ready for anything. And visible everywhere. That's the new, sporty all-rounder uvex exxential II LED. Light, ergonomic and with 31 integrated LED spots. It won the spoga horse TOP INNOVATIONS Award 2021. A lightweight in-mold helmet with a cool design, a longer section down the back of the neck, and a ventilation system for perfect temperature regulation. It always fits thanks to the 3D IAS system with millimeter-precision adjustment. An all-rounder that meets both riding and cycle helmet standards. So you get perfect protection on your bike and on horseback.

Smart battery

The innovative magnet attachment fixes the battery and battery indicator via a plug-in LED unit on the back of the helmet, in red for additional rear lighting. One charge lasts from six to twelve hours depending on usage and lighting mode.

31 LED Spots

The LED spots are invisible in standby mode. They are activated at the touch of a button in three different lighting modes – constant, blinking and pulsing – white at the sides and red at the back.

Protection by MIPS. An all-rounder with a comprehensive safety system. And a perfect fit.

The lightweight uvex exxential II MIPS all-round helmet protects you if you fall – even with an oblique impact. Its integrated Multidirectional Impact Protection System (MIPS) absorbs rotation movements that are dangerous for the brain. It's a great fit as the MIPS is height-adjustable, while the optimized inner lining boosts comfort and prevents your hair getting caught. And although you can't put a price on safety, the uvex exxential II MIPS is extremely good value for money. So it ticks every box.

Mips

**TUC
SSEN**

If you fall, you're not alone. Ride safely with Tocsen – for fast help in an emergency.

What happens if you're out for a ride alone and have an accident? With no-one around to help? In an emergency, the revolutionary uvex Tocsen technology sends an alert to get professional assistance. Its precision sensor detects falls – and can save your life. The system asks you to react – and if you don't, Tocsen automatically makes an alarm call together with your GPS location. The emergency call is also sent to the growing Tocsen community. That way, potential rescuers in the area are notified by the app and can get to the accident site to give first aid. Tocsen fits every helmet – just attach the sensor and it's ready to use immediately.

The Tocsen sensor is pre-integrated into the uvex elexxion Tocsen riding helmet. The Tocsen helmet series won the spoga horse TOP INNOVATIONS Award 2021.

**Fascinating beauty,

uvex onyx

The uvex suxseed blaze burgundy in high-gloss, rich red enhanced by a sophisticated and glamorous top. The result: pure femininity. Striking without being garish. And a perfect complement to a classic riding outfit.

A brilliant alternative? Elegance in matte with stand-out chrome accents. Focused on essentials, unmistakably pure. The uvex suxseed chrome in blue-coral. A masterly interplay between matte/glossy effects and amazingly beautiful details.

protecting people protecting planet

For over 90 years, we've been developing, making and selling products that protect people in their sport, leisure and work activities. And anyone who protects people needs to protect their environment too.

That's why we take good care to ensure that the entire value chain – from the product idea and development through to manufacturing and sales – stays in our hands. In our own state-of-the-art factories, mostly in Germany and elsewhere in Europe.

Ecologically and economically astute, ensuring fair working conditions and happy staff – that's what we're about. We call it: made in uvex. The result: smart and sustainable products that we develop using innovative materials that are uncompromisingly effective in form and function. Such as our sports eyewear from the uvex ocean series on page:

66

We have developed a label concept to cover our wide range of sustainability initiatives. It includes a detailed description of the uvex group's projects.

eyewear

Sustainable protection for eyes and environment

Our uvex ocean series sports eyewear looks great and ensure perfect vision – with top-quality polarized lenses providing 100% UVA, UVB and UVC protection to 400 nm.

And they protect our planet too. The frame is 100% made of recycled fishing nets. The lenses are 100% biodegradable. And the OEKO-TEX® 100-certified cotton strap – along with the eyewear pouch made of Tencel® – put the finishing touches on our sustainability concept.

tech summary

helmets

Tested protection

Anyone who wears a uvex helmet travels on the side of safety. Each of our helmets undergoes rigorous tests in the uvex testing center.

Certified in accordance with

EN 1384:2012-02 +
VG1 01.040 2014-12

Additionally GS tested

The voluntary test mark "GS" stands for geprüfte Sicherheit ("tested safety").

Find details about test criteria at: www.tuv.com

Shell construction

hardshell

The helmet has a molded outer shell and EPS inner shell for a most efficient safety combination: impact-resistant on the outside, shock-absorbing on the inside. This complex construction allows for built-in air vents and air channels to be perfectly placed for exceptional wearing comfort.

inmould

The protective EPS is foamed directly into the polycarbonate shell. For a light-weight helmet construction with the highest impact resistance and the perfect fusion of an EPS inner layer and a PC outer layer.

hybrid technology

Advanced technology unites the durable hard-shell construction of the upper helmet with the inmold process of the lower helmet.

Shell materials

Outer material

ABS

hardshell

Proven technology that has a hard shell for highly effective protection.

PC

inmould

Safety thanks to the strongly bonded PC shell.

Inner material

EPS

hardshell // inmould

Protective material made from microscopic air chambers that absorb the incident force of an impact.

Fit

Shell sizes

Perfect fit = head shape + head circumference. Whether large or small, rounder or squarer: uvex has the perfect shell size, from 49 to 61 cm, for every head in its range.

Monomatic

The uvex monomatic comfort lock can be opened and closed with one hand.

uvex IAS

With the uvex IAS 3.0 system, helmets can be adjusted in width.

uvex IAS 3D

The uvex 3D IAS 3.0 system offers the extra feature of precise adjustment to individual head height.

FAS

Fast Adapting System straps can be easily and continuously tailored to precisely fit your head shape.

R-FAS

The Ring Fast Adapting System strap ensures extra stability and can be easily adjusted with its steel ring.

Comfort

Vent system

uvex places the highest value on optimal ventilation: cleverly designed ventilation channels draw fresh air in and expel warm air.

Removable lining

Basic pads
Removable and washable padding.

X-fit pads

High quality, structured material for improved ventilation.
Removable, washable padding.

X-vent pads

High quality moisture-wicking material with embossed ventilation channels.
Comfortable on the skin, quick-drying, removable and washable.

Protective systems

MIPS

The Multi-Directional Impact Protection System (MIPS) protects the brain against rotational movements that can be very dangerous in case of an impact to the head.

TOCSEN SENSOR

The innovative Tocsen system comprises a crash sensor and app that detect a fall. Tocsen asks how the wearer is and if they don't respond, it automatically makes an emergency call with GPS location data to the person's emergency contacts and the Tocsen community.

gloves

| uvex sportstyle winter | 5 – 11 |
| uvex sportstyle kid | 4 – 6 |
| uvex sumair | 6 – 11 |
| uvex tensa II | 7 – 11 |
| uvex sportstyle diamond | 6 – 9 |
| uvex crx700 | 6 – 10.5 |
| uvex glamstar | 4 – 7 |

Multifit sizes

| model | sizes |
|----------------------|--------|
| uvex ventraxion | 5 – 11 |
| uvex ventraxion plus | 6 – 10 |

Stretch

uvex equestrian gloves mold to the hand like a second skin. High stretch and great ventilation for the best connection between you and your horse.

2D-Stretch

An elastic strap, held in place with zigzag stitching, provides stretch in two directions.

4D-Stretch

Stretchy fabric inserts provide stretch in every direction.

Comfort

Grip

uvex uses materials with an extremely high grip surface, ensuring reins always feel secure in the hand. Whether conditions are wet or dry, the horse can be reliably led at all times.

Ventilation

Flexible fabric inserts made from lightweight stretch material, plus perforations on the fingers, allow sweat and moisture to evaporate before they have a chance to build up in the glove.

Reinforced

Double layers of material are particularly hard-wearing. Lowstress areas have a single layer of material, for maximum sensitivity.

Touchscreen-compatible

Open-pored material at the fingertips on many uvex riding gloves allow the rider to comfortably feel the reins, and making the gloves touchscreen-compatible.
