The Gonso Fall/Winter 2025/2026 Collection!

This season, we are focusing on smart advancements of our proven products that perfectly combine function and style. Our Fall/Winter Collection 2025/26 builds on the successes of previous collections and underscores our mission to create cycling essentials with a perfect fit for every body and every riding style. Gonso stands for the essentials: comfort, warmth, and dryness on the bike – even in winter.

Feel good, ride better.

Let yourself be inspired by the modern, wintry colors of our collection, which, together with classic neon accents, create a cool, harmonious look.

NEON

Feel good,

Cycling wear with a perfect fit for any body and cycling style, keeping only what is essential.

ride better.

Always on the journey, never at the destination

We rely on our many years of experience, but we don't just rest on this experience either. As a pioneer of cycling pants, we are always looking for new ideas that make the cycling experience even more amazing.

People are at the centre of what we do

We celebrate physical diversity, and our collections reflect this. Our cuts adapt to our customers and not the other way around.

Keeping track of the essentials

We always stay at the cutting edge, but we don't go chasing every new trend. Everything that stands in the way of the pure cycling experience is consistently eliminated.

This focus on the essentials can be seen in the design of our collections, in our communications and in our appearance.

From a love of cycling

We are connected by an enthusiasm for cycling. We give each other mutual support and bring Gonso forward together as a team. Each and every one of us identifies with the brand and wears it personally when cycling.

The Gonso method

We at Gonso believe that a cycling pants product is only finished when all sizes fit perfectly – even if the journey there is longer and harder. We see every piece of feedback as inspiration.

We test, revise and redevelop. Every idea inspires us to become even better so that every Gonso pants product you buy is the best.

Everything starts with an idea. We combine market research with our own experience and customer feedback. That is how the initial product idea is created.

Once the product concept is done, we select premium materials and the right ingredients. We draw up the first few sketches.

In addition, a modern colour concept is created for the new collection.

'Every cycling pants must go through individual pattern grading, development and fitting. With us, there's no run-of-the-mill cuts.'

Heike Schönnemann, pattern maker

To achieve the optimal fit, each cycling pants model is first broken down into complementary, individual parts.

The individual elements are used to create an initial prototype. The cut and fit are optimised based on this prototype.

We adapt our prototypes to real people instead of tailor's dummies, so we can be more specific in considering body shapes and the way they change when moving.

The base size is scaled up and down to create different sizes in line with the product and body area. The non-linear scaling of the size increments creates products that fit in every size. After this, the production process begins.

Men's cycling

pants

The perfect cycling pants for any occasion.

Sitivo – one cycling pants, three variants

Gonso has analysed the everyday problems of cycling in detail and, as an answer, developed the Sitivo cycling pants.

Cycling wear that caters to the individual requirements and pressure points of each cyclist thanks to three different pads, all with an aim of making cycling a pleasure.

SQlab Go

Premium fabric

Unique elasticity, super soft to wear and a surface with optimum breathability and optimum moisture transfer.

Orthopaedic TPE gel

Specially developed for medical shear-force absorption.

Super high density foam

Offers super-high density with first-rate breathability as well as improved shock absorption characteristics.

Why has firm cycling pants padding not been around for longer?

Because high-quality foams with better shock absorption characteristics are denser, which means they lose breathability.

Firm cycling pants padding

Using a patented method, SQlab has managed to break open the structures of very dense foam. The outcome is high breathability comparable to traditional padding while maintaining full, perfect shock absorption.

Minimisation of shear forces

Pain is not usually caused by pressure, but rather the shear forces at the periosteum, a layer of tissue enveloping the bone. These forces are created by pedalling and constant movement of the saddle. SQlab Pads M and W contain a thin layer of orthopaedic TPE gel specially developed to minimise shear forces for medical purposes.

Long-lasting

Premium and particularly elastic functional material with high compression

Features

Especially wide silicone leg grippers for perfect grip and comfort

Precise fit

Athletic fit with innovative cut, extra-wide elastic bib for the best grip or a comfortable waistband

SQlab Pad

Innovative SQlab Pad with TPE gel, just 6 or 8 mm thin and especially firm

Sitivo – one cycling pants, three variants

Gonso has analysed the everyday problems of cycling in detail and, as an answer, developed the Sitivo cycling pants.

Cycling wear that caters to the individual requirements and pressure points of each cyclist thanks to three different pads, all with an aim of making cycling a pleasure.

"Our Sitivo cycling pants for all needs"

SQlab Go

Premium fabric

Unique elasticity, super soft to wear and a surface with optimum breathability and optimum moisture transfer.

Orthopaedic TPE gel

Specially developed for medical shear-force absorption.

Super high density foam

Offers super-high density with first-rate breathability as well as improved shock absorption characteristics.

Why has firm cycling pants padding not been around for longer?

Because high-quality foams with better shock absorption characteristics are denser, which means they lose breathability.

Firm cycling pants padding

Using a patented method, SQlab has managed to break open the structures of very dense foam. The outcome is high breathability comparable to traditional padding while maintaining full, perfect shock absorption.

Minimisation of shear forces

Pain is not usually caused by pressure, but rather the shear forces at the periosteum, a layer of tissue enveloping the bone. These forces are created by pedalling and constant movement of the saddle. SQlab Pads M and W contain a thin layer of orthopaedic TPE gel specially developed to minimise shear forces for medical purposes.

Long-lasting

Premium and particularly elastic functional material with high compression

Features

Especially wide silicone leg grippers for perfect grip and comfort

Precise fit

Athletic fit with innovative cut, extra-wide elastic bib for the best grip or a comfortable waistband

SQlab Pad

Innovative SQlab Pad with TPE gel, just 6 or 8 mm thin and especially firm

Padding for all needs.

Sitivo Blue

The blue Sitivo padding is perfect for an upright sitting position.

Sitivo Green

The green Sitivo padding is perfect for a compact sitting position.

Sitivo Red

The red Sitivo padding is perfect for an athletic sitting position.

SQlab Pad

Dry Up

Dry Up Air

Anatomic M

Anatomic W

Density 60 kg/m³

 Padding thickness 18 mm

 Foam Soft

 Padding material: foam, Poron®

- ✓ Outstanding comfort with reinforced padding at rear pressure point
- ✓ Shock-absorbing Poron® elements at rear and front pressure points
- ✓ No pressure points, high stability and absorption, pure cycling enjoyment

Density 80 kg/m³

 Padding thickness 16 mm

 Foam Medium

 Padding material: foam, Poron®

- ✓ Maximum comfort with padding precision-tailored to entire seat area
- ✓ Shock-absorbing Poron® elements on centre pressure points
- ✓ No pressure points, high stability and absorption, pure cycling enjoyment

Density 90 kg/m³

 Padding thickness 15 mm

 Foam Hard

 Padding material: foam, Poron®

- ✓ Direct contact, maximum stability from precision-tailored padding
- ✓ Shock-absorbing Poron® elements on front pressure point
- ✓ No pressure points, high stability and absorption, pure cycling enjoyment

Density 360 kg/m³

 Padding thickness 6/8 mm

 Foam Very hard

 Padding material: Foam + TPE shear force gel

- ✓ The SQlab Pad padding is max. 6 mm (M) or 8 mm (W) thick and is firm
- ✓ Adapts to body shape as mileage increases and becomes more and more comfortable
- ✓ Reduced shear forces thanks to thin layer of medical TPE gel

Density 80 kg/m³

 Padding thickness 10 mm

 Foam Medium

 Padding material: Foam

- ✓ 3D elasticity for outstanding ergonomics
- ✓ Absorbs pressure and vibration for maximum comfort and enjoyment
- ✓ Seamless – no pressure points, for maximum enjoyment

Density 90 kg/m³

 Padding thickness 10 mm

 Foam Hard

 Padding material: Foam

- ✓ Perforations and ventilation channels for optimal thermal regulation
- ✓ 3D elasticity for outstanding ergonomics
- ✓ Absorbs pressure and vibration for maximum comfort and enjoyment

Density 80 kg/m³

 Padding thickness 12 mm

 Foam Hard

 Padding material: Foam

- ✓ Recycled outer fabric and support inserts
- ✓ Ergonomic shape fits to body
- ✓ Reduced pressure and numbness, less friction against skin

Density 120 kg/m³

 Padding thickness 12 mm

 Foam Hard

 Padding material: Foam

- ✓ Recycled outer fabric
- ✓ Front insert made of mesh for more ventilation & comfort
- ✓ Extra-soft outer fabric and comfortable darted edges
