Colourways

Gonso. Feel good, ride better.

We may have a new look and a new logo – and an enhanced collection – but despite that, we still remain who we are at our core. We develop cycling wear with a perfect fit for any body and cycling style, and only keep what is essential. Our focus is on enabling our customers to have their best cycling experience. With our many years of experience and crafty approach, we create cycling wear that adapts to all our customers' body shapes and ways of wearing their clothing.

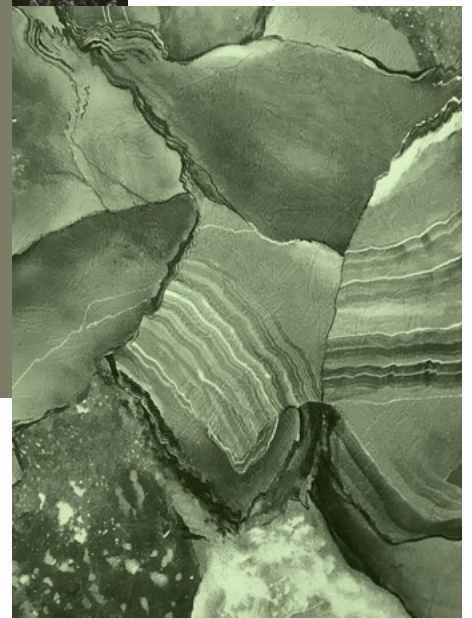

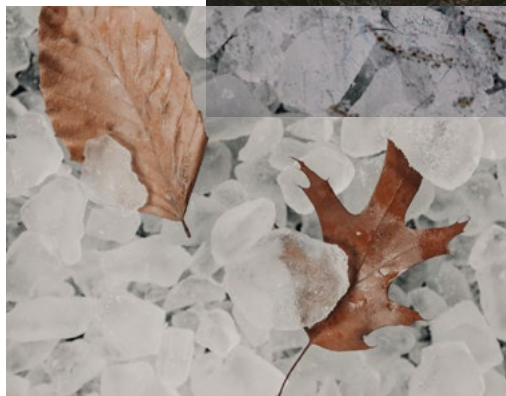

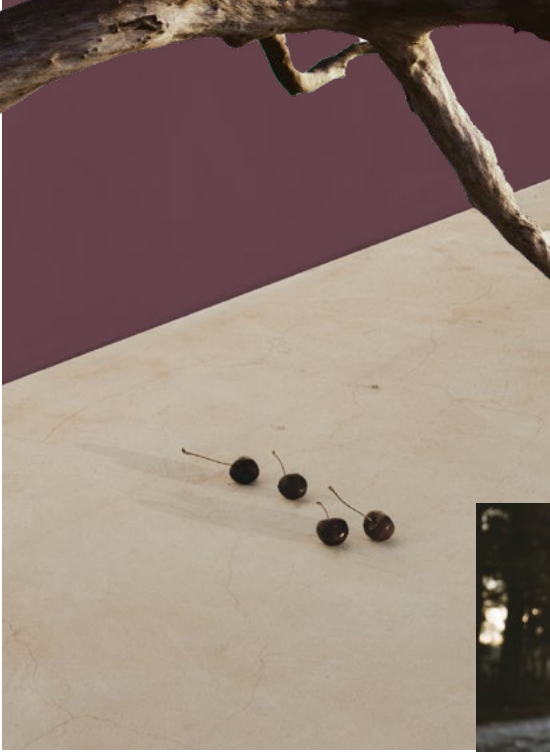

A sophisticated and slimmed-down collection meets a unisex colour palette that can be combined in versatile

ways. It includes a mix of earthy and bright tones, stylish prints and modern unisex colourways. Classics in new colours, an optimised Adventure collection, new off-bike tops and much more – there is quite a bit happening at Gonso this spring/summer 2025. That is why we have also taken the opportunity to give a new look and feel to our workbook, website and POS material as well as the hang tags and packaging on our products.

We are looking forward to continuing our journey together. Working with you, we wish to guide our customers as they find their inner balance through cycling.

20245 fiesta red	20248 indie blue				

Feel good,

Cycling wear with a perfect fit for any body and cycling style, keeping only what is essential.

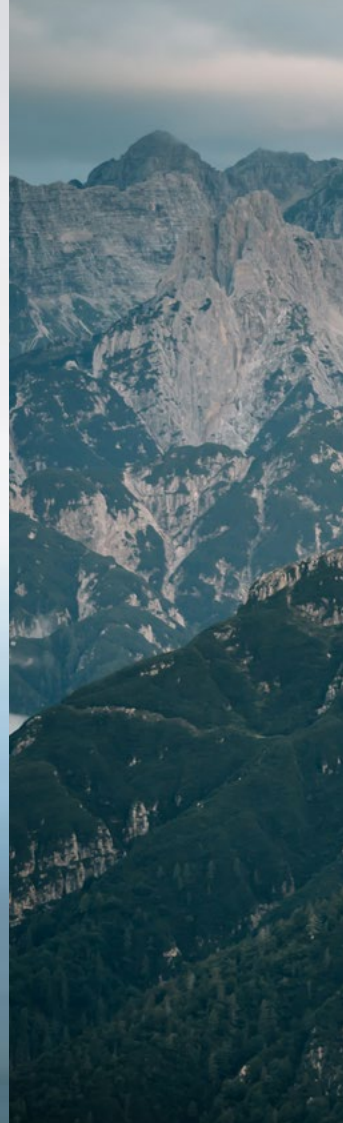

ride better.

The cycling legwear expert

Always on the journey, never at the destination

We are helped by our many years of experience, but we don't just rest on this experience either. As a pioneer of cycling legwear, we are always looking for new ideas that make the cycling experience even more amazing.

People are at the centre of what we do

We celebrate physical diversity, and our collections reflect this. Our cuts adapt to our customers and not the other way around.

Keeping track of the essentials

We always stay at the cutting edge, but we don't go chasing every new trend. We choose to ignore anything that gets in the way of pure cycling pleasure. This focus on the essentials can be seen in the design of our collections, in our communications and in our appearance.

From a love of cycling

We are connected by an enthusiasm for cycling. We give each other mutual support and bring Gonso forward together as a team. Each and every one of us identifies with the brand and wears it personally when cycling.

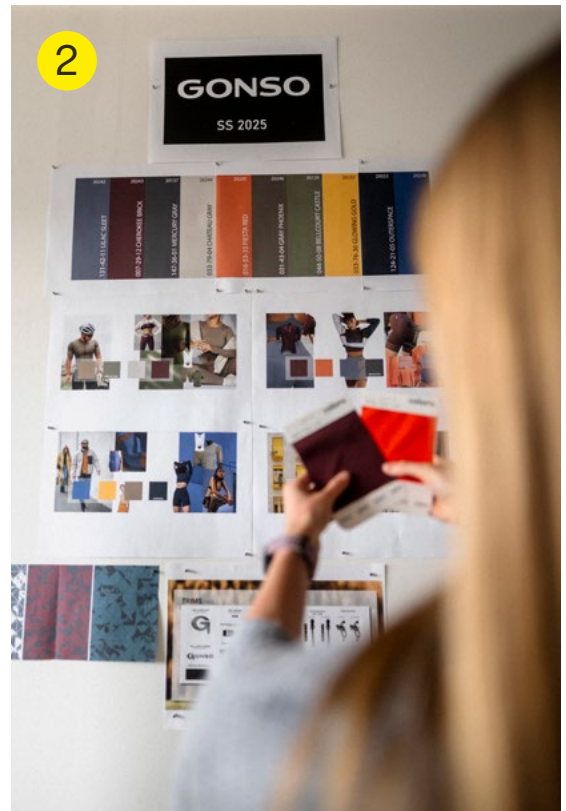

The Gonso method

We at Gonso believe that a cycling legwear product is only finished when all sizes fit perfectly – even if the journey there is longer and harder. We see every piece of feedback as inspiration.

We test, revise and redevelop. Every idea inspires us to become even better so that every Gonso legwear product you buy is the best.

Everything starts with an idea. We combine market research with our own experience and customer feedback, and that is how the initial product idea is created.

Once the product concept is done, we select premium materials and the right ingredients. We draw up the first few sketches.

In addition, a modern colour concept is created for the new collection.

'Every cycling legwear product must go through individual pattern grading, development and fitting. With us, there's no run-of-the-mill cuts.'

Heike Schöнемann, pattern maker

To achieve the optimal fit, each legwear model is first broken down into complementary, individual parts.

The individual elements are used to create an initial prototype. The cut and fit are optimised based on this prototype.

We adapt our prototypes to real people instead of tailor's dummies, so we can be more specific in considering body shapes and the way they change when moving.

The base size is scaled up and down to create different sizes in line with the product and body area. The non-linear scaling of the size increments creates products that fit in every size. After this, the production process begins.

Men's cycling

legwear

The perfect cycling legwear for any occasion.

Sitivo – one legwear product, three variants

Gonso has analysed the everyday problems of cycling in detail and, as an answer, developed the Sitivo cycling legwear. Cycling legwear that caters to the individual

requirements and pressure points of each cyclist thanks to three different pads, all with an aim of making cycling a pleasure.

Our Sitivo
padding for
all needs

Men

Premium materials

Highly elastic material made of recycled polyamide yarn with increased compression

Precise fit

Optimised fit and comfortable bib structure or waistband

Sitio padding

Adapted to individual bicycle sitting position

Features

Anti-slip leg grippers with silicone print for perfect grip

SQlab Go

Premium fabric

Unique elasticity, super soft to wear and a surface with optimum breathability and optimum moisture transfer.

Orthopaedic TPE gel

Specially developed for medical shear-force absorption.

Super high density foam

Offers super-high density with first-rate breathability as well as improved shock absorption characteristics.

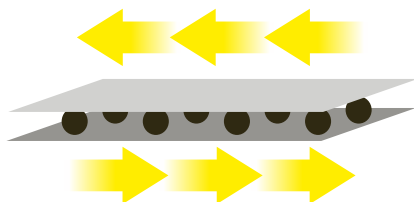

Why has firm legwear padding not been around for longer? Because high-quality foams with better shock absorption characteristics are denser, which means they lose breathability.

Firm legwear padding

Using a patented method, SQlab has managed to break open the structures of very dense foam. The outcome is high breathability comparable to traditional padding while maintaining full, perfect shock absorption.

Minimisation of shear forces

Pain is not usually caused by pressure, but rather the shear forces at the periosteum, a layer of tissue enveloping the bone. These forces are created by pedalling and constant movement of the saddle. SQlab Pads M and W contain a thin layer of orthopaedic TPE gel specially developed to minimise shear forces for medical purposes.

Long-lasting

Premium and particularly elastic functional material with high compression

Features

Especially wide silicone leg grippers for perfect grip and comfort

Precise fit

Athletic fit with innovative cut, extra-wide elastic bib for the best grip or a comfortable waistband

SQlab Pad

Innovative SQlab Pad with TPE gel, just 6 or 8 mm thin and especially firm

Wear, return, repeat: the Gonso cycle

Welcome to the future of sustainable cycling wear! Our new Ride Miles Circle Bibs for women and men aren't just exceptionally high-quality clothing for cyclists, but also – and much more – a statement for the circular economy.

Developed with a focus on separable materials and made at our own production site in Turkey, every legwear product features a QR code. Here you can find all the information about sustainable production and the

material compositions used – basically, all the information that is essential for the recycling process.

Once you've worn this product on your adventures, its story will continue: simply feed it to the next stage in its life cycle! Specialised contractors will take care of the mechanical textile recycling, turning your cycling legwear product into a high-quality raw material that will start a new life.

Sitivo – one legwear product, three variants

Gonso has analysed the everyday problems of cycling in detail and, as an answer, developed the Sitivo cycling legwear.

Cycling legwear that caters to the individual requirements and pressure points of each cyclist thanks to three different pads, all with an aim of making cycling a pleasure.

Our Sitivo
padding for
all needs

SQlab Go

Premium fabric

Unique elasticity, super soft to wear and a surface with optimum breathability and optimum moisture transfer.

Orthopaedic TPE gel

Specially developed for medical shear-force absorption.

Super high density foam

Offers super-high density with first-rate breathability as well as improved shock absorption characteristics.

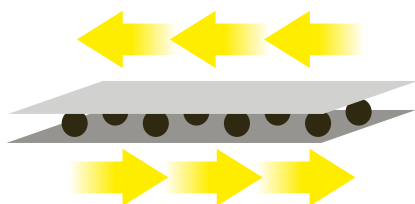

Why has firm legwear padding not been around for longer? Because high-quality foams with better shock absorption characteristics are denser, which means they lose breathability.

Firm legwear padding

Using a patented method, SQlab has managed to break open the structures of very dense foam. The outcome is high breathability comparable to traditional padding while maintaining full, perfect shock absorption.

Minimisation of shear forces

Pain is not usually caused by pressure, but rather the shear forces at the periosteum, a layer of tissue enveloping the bone. These forces are created by pedalling and constant movement of the saddle. SQlab Pads M and W contain a thin layer of orthopaedic TPE gel specially developed to minimise shear forces for medical purposes.

Long-lasting

Premium and particularly elastic functional material with high compression

Features

Especially wide silicone leg grippers for perfect grip and comfort

Precise fit

Athletic fit with innovative cut, extra-wide elastic bib for the best grip or a comfortable waistband

SQlab Pad

Innovative SQlab Pad with TPE gel, just 6 or 8 mm thin and especially firm

Women's cycling legwear

Wear, return, repeat: the Gonso cycle

Welcome to the future of sustainable cycling wear! Our new Ride Miles Circle Bibs for women and men aren't just exceptionally high-quality clothing for cyclists, but also – and much more – a statement for the circular economy.

Developed with a focus on separable materials and made at our own production site in Turkey, every legwear product features a QR code. Here you can find all the information about sustainable production and the

material compositions used – basically, all the information that is essential for the recycling process.

Once you've worn this product on your adventures, its story will continue: simply feed it to the next stage in its life cycle! Specialised contractors will take care of the mechanical textile recycling, turning your cycling legwear product into a high-quality raw material that will start a new life.

The red Sitivo padding is perfect for an athletic sitting position.

SQlab Pad

Dry Up

Dry Up Air

Anatomic M

Anatomic W

Density 60 kg/m³

 Padding thickness 18 mm

 Foam Soft

 Padding material: foam, Poron®

- ✓ Outstanding comfort with reinforced padding at rear pressure point
- ✓ Shock-absorbing Poron® elements at rear and front pressure points
- ✓ No pressure points, high stability and absorption, pure cycling enjoyment

Density 80 kg/m³

 Padding thickness 16 mm

 Foam Medium

 Padding material: foam, Poron®

- ✓ Maximum comfort with padding precision-tailored to entire seat area
- ✓ Shock-absorbing Poron® elements on centre pressure points
- ✓ No pressure points, high stability and absorption, pure cycling enjoyment

Density 90 kg/m³

 Padding thickness 15 mm

 Foam Hard

 Padding material: foam, Poron®

- ✓ Direct contact, maximum stability from precision-tailored padding
- ✓ Shock-absorbing Poron® elements on front pressure point
- ✓ No pressure points, high stability and absorption, pure cycling enjoyment

Density 360 kg/m³

 Padding thickness 6/8 mm

 Foam Very hard

 Padding material: Foam + TPE shear force gel

- ✓ The SQlab Pad padding is max. 6 mm (M) or 8 mm (W) thick and is firm
- ✓ Adapts to body shape as mileage increases and becomes more and more comfortable
- ✓ Reduced shear forces thanks to thin layer of medical TPE gel

Density 80 kg/m³

 Padding thickness 10 mm

 Foam Medium

 Padding material: Foam

- ✓ 3D elasticity for outstanding ergonomics
- ✓ Absorbs pressure and vibration for maximum comfort and enjoyment
- ✓ Seamless – no pressure points, for maximum enjoyment

Density 90 kg/m³

 Padding thickness 10 mm

 Foam Hard

 Padding material: Foam

- ✓ Perforations and ventilation channels for optimal thermal regulation
- ✓ 3D elasticity for outstanding ergonomics
- ✓ Absorbs pressure and vibration for maximum comfort and enjoyment

Density 80 kg/m³

 Padding thickness 12 mm

 Foam Hard

 Padding material: Foam

- ✓ Recycled outer fabric and support inserts
- ✓ Ergonomic shape fits to body
- ✓ Reduced pressure and numbness, less friction against skin

Density 120 kg/m³

 Padding thickness 12 mm

 Foam Hard

 Padding material: Foam

- ✓ Recycled outer fabric
- ✓ Front insert made of mesh for more ventilation & comfort
- ✓ Extra-soft outer fabric and comfortable darted edges
