made2perform

uvex is performance.

made2perform is our pledge to design and manufacture products that deliver exceptional performance without compromising on safety, comfort, quality or sustainability. Products that perform – from the workplace through to the world of sports and leisure.

uvex stands for passion, motivation, and excellence. "made2perform" is a motivating force for our customers, athletes, uvex employees, and all those who aspire to the winner's podium.

uvex

protecting people since 1926

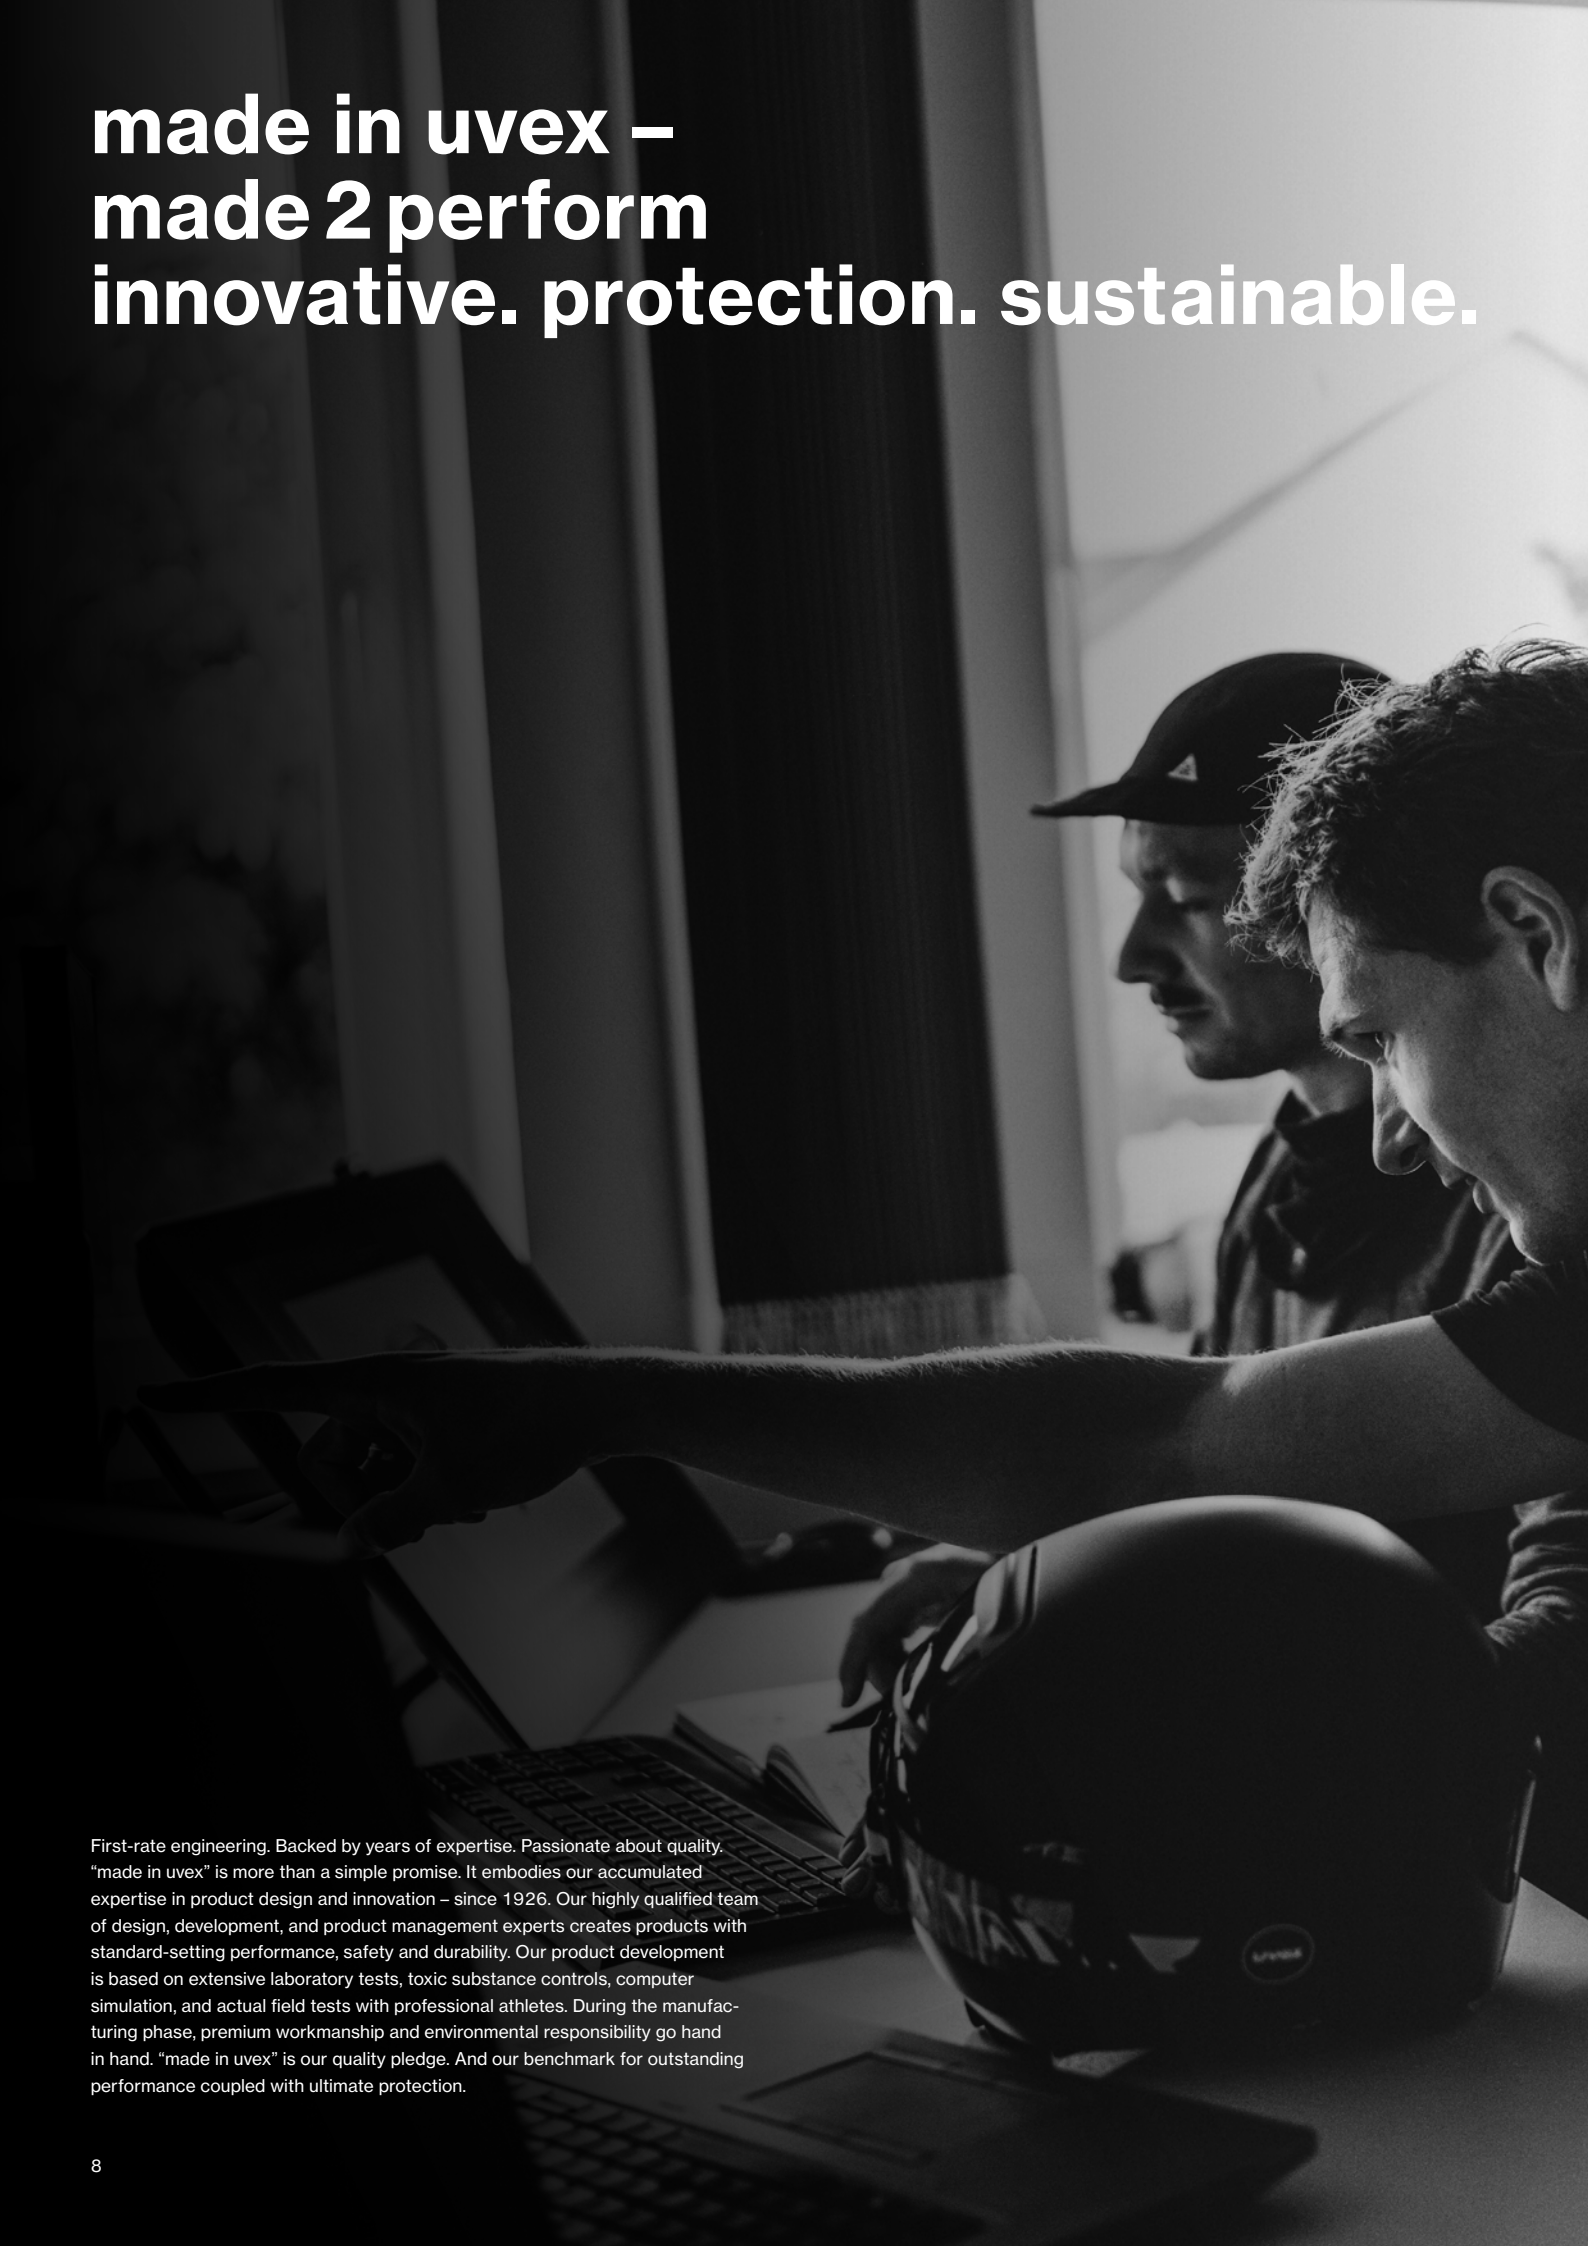

**Professional or recreational. Competition or fun.
As one of the leading international manufacturers
of protective products with headquarters in Fuerth,
we at uvex inspire our customers every day with
groundbreaking technologies and innovative products.
24/7 – since 1926. To achieve the best, whether
in leisure, sports or work. To protect people.**

“I’m really happy to be part of the uvex family. For me it’s important to feel comfortable and really protected and so far it works pretty good. Thank you.”

Cyprien Sarrazin, FRA

**made in uvex –
made 2 perform
innovative. protection. sustainable.**

First-rate engineering. Backed by years of expertise. Passionate about quality. "made in uvex" is more than a simple promise. It embodies our accumulated expertise in product design and innovation – since 1926. Our highly qualified team of design, development, and product management experts creates products with standard-setting performance, safety and durability. Our product development is based on extensive laboratory tests, toxic substance controls, computer simulation, and actual field tests with professional athletes. During the manufacturing phase, premium workmanship and environmental responsibility go hand in hand. "made in uvex" is our quality pledge. And our benchmark for outstanding performance coupled with ultimate protection.

Winning innovation

Cutting-edge development. Longstanding product expertise. Maximum safety. The uvex name has been synonymous with innovative products for almost 100 years. We surpass industry standards. We perfect and finetune our sports equipment through rigorous lab tests and field tests, and by using pioneering computer simulation.

Winning performance

Multiple test winners. Full confidence. Absolute dependability. Developed by expert engineers, tested by professional athletes. Our helmets, eyewear, and protective equipment meet the highest standards in safety and reliability. "made in uvex" quality—outstanding performance for every application.

Winning design

Perfected functionality. Top performance. Stylish looks. In our HQ at Fuerth, the design team sets new standards. Our helmets and eyewear are not only highly protective and highly durable—they are also trendsetting, statement pieces. Product design that's visually and technically outstanding.

Winning sustainability

Eco-friendly materials. Shorter transport routes. Fair working conditions. Our vision of sustainability is clear. Responsible, innovative and progressive technologies. Sustainable raw materials and minimised CO₂ emissions. A conscientious approach to the environment and our employees. These are the three pillars of our 'Protecting Planet' strategy. Our goal is to be climate neutral by 2045. It may sound a long way off, but for the plastics industry it's an ambitious target. It's a challenge that spurs us on. Because that's who we are.

made 2 perform. unstoppable speed. no concession. revolutionary performance. uvex resolution.

Top performance. Maximum protection. An all-mountain helmet needs to perform well both on- and off-piste. The uvex resolution meets this challenge through its revolutionary safety and comfort features. Challenging conditions? Not an issue. The uvex resolution's hardshell technology combines a tough ABS hardshell with a two-part EPS inner shell. This results in optimum impact resistance, effective shock absorption and outstanding insulation. And the built-in Mips® safety system absorbs rotational forces during a fall, while the uvex IAS system creates a precise, secure fit around the shape of the head. The COOLMAX® EcoMade liner adds to the wear comfort and the helmet's internal climate. An active ventilation system with multiple openings ensures outstanding airflow and prevents goggles from misting up, no matter how fast you're going. The practical magnetic Fidlock® buckle on the chin strap is easy to operate with one hand even when wearing gloves. When skiing on- or off-piste, it's really important you can hear the sounds around you. And so the hear+- ear pads give this helmet clear acoustics, with the option of adding thermal inserts on extra cold days. uvex resolution: join the no-compromise performance revolution.

Page 20

Temperature regulation:
two-part removable COOLMAX
Eco Made all season liner

Clear acoustics: ear pads with hear+
Through technology for better ambient
sound perception

Easy handling: magnetic
Fidlock® buckle

Temperature regulation:
adjustable active ventilation
system throughout

Reliable protection: tough ABS
hardshell with two-part EPS
inner shell for extreme impact
resistance and effective shock
absorption, plus integrated
Mips® safety system

Precise custom fit:
uvex IAS Fit System

uvex resolution. made for athletes. made for you.

The uvex resolution helmets are developed in close collaboration with professional athletes. Each one combining premium quality, safety and performance. The result: Helmets made for pros and ambitious winter sports athletes alike. Whether it's a performance pro model, a MIPS model or a standard model, there's a uvex resolution model to match your set-up and style. So you can focus on giving your all.

All models boast: a tough ABS hardshell with two-piece EPS inner shell for extreme impact resistance and effective shock absorption, uvex IAS system for custom fit adjustment, and hear+- ear pads for outstanding acoustics. Model-specific extras: built-in Mips® safety system, uvex Monomatic or Fidlock® buckle, active or passive ventilation, thermal inserts and a steel chin guard.

Goggle perfection. It's in the uvex genes.

Ski goggles form the beating heart of the uvex collection. As a leading manufacturer of ski goggles, we set industry standards. Pushing forward innovation and coming up with new, highly technical solutions results in improved consumer experience and top spec goggles. Products made by uvex are state-of-the-art and deliver the highest safety and comfort standards – on and off the piste. Passion and expertise – in every pair of uvex ski goggles.

Lens tech. Everything in view – whatever the conditions.

The uvex brand's DNA is embedded in our ski goggles – especially our leading lens technologies. All made possible by our inhouse engineering and our own production facilities. uvex colorvision® (CV) delivers ultimate contrast and maximum colour perception – even when visibility is very poor. The self-tinting uvex variomatic® (V) lenses adapt from light to dark in a few seconds – as soon as the light conditions change. The uvex supravision® (S) coating technology, available for all uvex ski goggles, ensures you have fog-free and accurate vision.

#made2perform

**uvex colorvision® (CV):
wow effect included**

- Ultimate contrast enhancement
- Maximum colour perception
- 100 % UVA, UVB, UVC protection up to 400 nm
- 15 % wider field of vision

uvex supravision® (S):
unequaled anti-fog performance

- 200% more anti-fog (vs. standard)
- 100% UVA, UVB, UVC protection up to 400 nm
- Unbreakable for maximum protection

uvex variomatic® (V):
top-flight comfort

- Automatic, stepless self-tinting
- Five protection levels (S0-4, S0-2 and S1-3)
- From light to dark in 25 seconds

uvex colorvision® sharpen your vision.

Meet uvex CV. A synonym for the highest level of contrast between bright colours – regardless of locations and conditions. On the piste, in deep snow, on demanding tours. Plus: stronger depth perception if visibility gets low. Ensures better performance and maximum safety. Always. Everywhere.

- Ultimate contrast enhancement
- Maximum colour perception
- 100% UVA, UVB, UVC protection up to 400 nm
- 15% wider field of vision

with uvex colorvision®

without uvex colorvision®

uvex ski goggles. High-end technology. And outstanding design.

uvex ski goggles. A success story right from the first day. Always highly functional with groundbreaking innovations – from anti-fog coatings and contrast enhancement to reduced light reflections, automatic tinting, a larger field of vision and optimized peripheral vision.

The result? 100 percent performance, function, comfort and design. In all weather and visibility conditions. For ambitious amateur sports enthusiasts as well as elite athletes.

And our success story doesn't stop there. We've developed cylindrical, spherical and toric lenses – plus our unique ATTRACT-TEC magnetic interchangeable lenses. All made in uvex, with passion and top-flight expertise. All part of our DNA.

made in uvex

uvex victorious – one for all. uvex goggles for all conditions.

Different conditions. Different needs. Different models. The uvex victorious goggles with a range of innovative uvex technologies, features and designs.

For narrower faces, too. Because we want to offer the best solutions for all conditions – to maximise your experience.

uvex victorious CV

Cool design, comfort and functional performance for carving up the pistes. uvex technology for athletic skiers: A spherical single lens with uvex colorvision® for enhanced colour and contrast performance, with uvex supravision® anti-fog coating for mist-free vision.

Page 69

uvex victorious FM

Stylish understatement, comfort and technical sophistication to cut a cool image on and off the slopes. uvex technology for style points: A mirrored spherical double lens for bluebird days on the piste that cuts out 100 % of UVA, UVB and UVC rays. While uvex supravision® anti-fog coating ensures mist-free vision.

Page 75

uvex victorious pro V

Aerodynamic design, comfort and premium performance – for racing and on the piste. uvex technology for pros: A spherical double lens with self-tinting uvex variomatic® technology and category 0–4 light transmission that adjusts automatically to all light conditions and cuts out 100% of UVA, UVB and UVC rays. While uvex supravision® anti-fog coating ensures mist-free vision.

Page 57

uvex victorious V

Sporty design and comfort for fast-paced performance on the piste. uvex technology for piste gods: A spherical double lens with self-tinting uvex variomatic® technology that adjusts automatically to light conditions and cuts out 100% of UVA, UVB and UVC rays. While uvex supravision® anti-fog coating ensures mist-free vision.

tech summary helmets

Tested for safety

Ski helmet standard
EN 1077:2007

Mountaineering helmet standard
EN 12492:2012

Bicycle helmet standards
EN 1078:2012 + A1:2012

Also GS tested

The voluntary certification mark "GS" stands for "Geprüfte Sicherheit" ("tested safety"). More details on the test criteria are available at: www.uvex-sports.com/ce

Shell technologies

hardshell

A highly effective combination of an injection-molded outer shell and an EPS inner shell, making it:

- Robust
- Highly impact-resistant
- Shock-absorbent
- Insulated against cold

inmould

The EPS is injected directly into the polycarbonate shell to make it:

- Light
- Impact-resistant

hybrid-technology

The robust hardshell on the upper part of the helmet is bonded to the lower part using the Inmould process for:

- Perfect ventilation
- Impact resistance
- Optimal fusion of the hardshell and inmould technology

+technology

Innovative and very light special polymer.

Shell material

Polycarbonate

inmould
Protective as the PC layer is firmly bonded to the EPS layer

CFK

hardshell
Polymer reinforced with carbon fiber used in high-end and lightweight helmets

ABS

hardshell
Ultra-effective protection and maximum robustness

EPS

hardshell // inmould // hybrid
Protective material comprising microscopically small air cells that absorb the force of an impact

Comfort

hear+-technology

Ear pads with hear+-technology generate improved ambient sound perception and outstanding acoustics.

Fit

Monomatic

The uvex monomatic comfort fastener can be opened and closed with just one hand.

Protective systems

MIPS

The Multi-Directional Impact Protection System (MIPS) protects the brain against rotational movements that can be very dangerous in case of an impact to the head.

FIDLOCK

The FIDLOCK magnetic buckle uses magnets for one-handed operation, even when wearing gloves.

Fit adjustment systems

Comfort features

IAS

Optimal width adjustment
with an ergonomic dial system

3D IAS

Optimal width and height adjustment
with an ergonomic dial system

tech summary goggles

Lens technology

uvex colorvision® (CV)

These tinted uvex colorvision® lenses with a +15 % bigger field of vision deliver maximum contrast enhancement for single lenses and +400 % anti-fog effect compared to the standard.

uvex colorvision® green

Green is the variant for good weather and the perfect choice when it's sunny or slightly cloudy.

uvex colorvision® yellow

Yellow works hard when it's cloudy or snowing, providing the best possible vision in difficult visibility conditions.

uvex colorvision® orange

Orange is a universal all-rounder and suitable for any weather.

uvex colorvision® purple

Purple power – popping contrast in changeable terrain and wide-ranging light conditions.

uvex supravision®

This uvex core technology proved in tests that it offers 200 % more anti-fog compared to the standard and stays fog-free up to 60 seconds: precise vision and maximum protection. Includes 100 % UVA, UVB and UVC protection up to 400 nm.

uvex variomatic® (V)

The automatic and stepless self-tinting, from light to dark in 25 seconds, combines five protection levels (S0–S4) and uvex supravision® anti-fog coating in one product. Plus: the lenses offer 100 % UVA, UVB and UVC protection.

uvex ATTRACT tec

The uvex ATTRACT tec magnetic interchangeable lens technology for fast lens changes in just one click.

Ski goggle protection

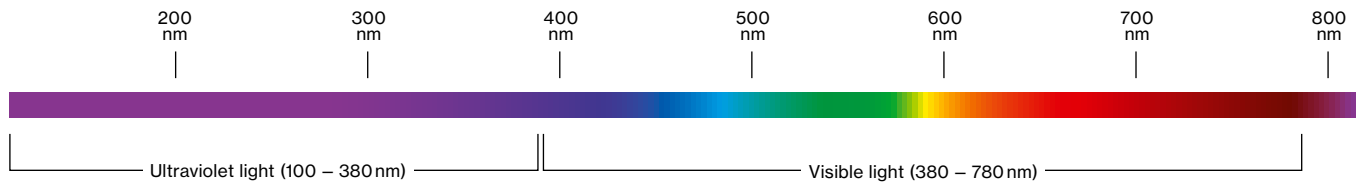

Crack-resistant

NORM: EN 174:2001

Tested with the demanding impact test. Further information in the uvex Techbook.

Scratch-resistant

Ultra-robust polycarbonate lenses resist sub-zero temperatures without compromising their strength. A special coating protects them from scratches. Further information in the uvex Techbook.

100 % UV protection up to 400 nm

Our UV absorber offers 100 % protection against damaging UV rays up to 400 nm.

tech summary eyewear

Lens technology

uvex colorvision®

The four innovative uvex colorvision® tints provide ultimate contrast and perfect vision – with a matching lens for every situation.

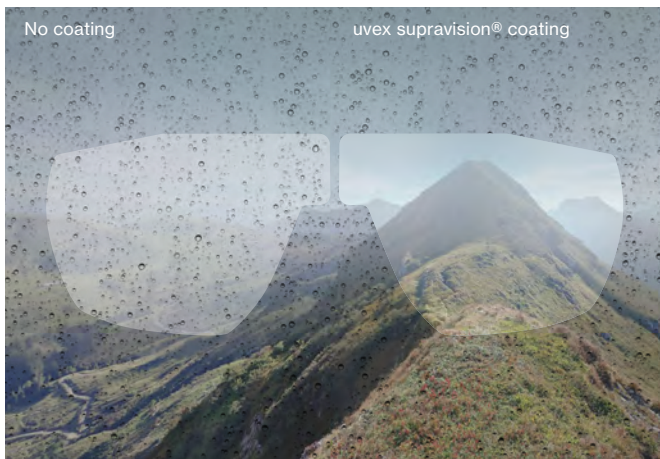

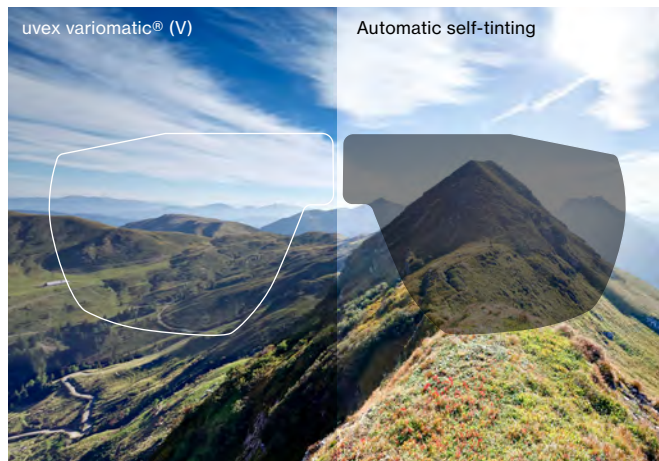

- Ultimate contrast enhancement
- Maximum color perception
- 100% UVA, UVB, UVC protection up to 400 nm

uvex variomatic®

Eyewear with uvex variomatic® automatically reacts to the natural light conditions.

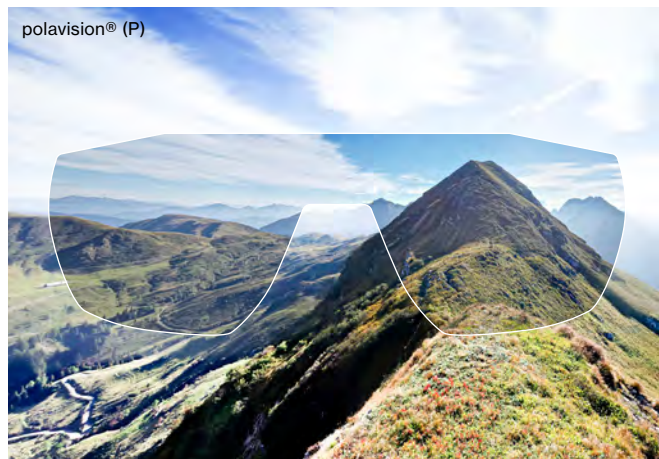

- Automatic, stepless self-tinting
- From light to dark in 25 seconds
- Three levels of protection in one lens (cat. 1–3 and cat. 2–4)
- 100% UVA, UVB, UVC protection up to 400 nm

uvex supravision®

The uvex supravision® coating ensures fog-free vision without affecting the optical quality of the lens. It remains fog-free for twice as long as specified by the standard.

- 200% more anti-fog (vs. standard)
- Break-resistant for maximum protection
- 100% UVA, UVB, UVC protection up to 400 nm

uvex polavision®

Reliable protection against reflections and glare: the lenses of the uvex polavision® series absorb diffused light and reliably protect the eyes from overexertion.

- Polarizing lenses against annoying reflections
- Reduce stray light and glare
- For a comfortable viewing experience

uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: lens tinting and contrast enhancement – in a single, innovative uvex lens. Made for sports activities in any weather and any environment.

Decentered lens technology

Distortions and curvatures in the field of view can quickly lead to irritation. uvex therefore uses grade 1 decentered lenses, which allow a distortion-free view.

Direct lens ventilation

The uvex temperature competence ensures permanent, draft-free ventilation. This keeps the field of view fog-free twice as long as conventional standards demand.

Easy to clean

The special coating on the lens allows moisture or fingerprints to be easily removed.

VPX

uvex sunglasses with variomatic polavision extended technology (VPX) – featuring automatic, stepless self-tinting in all light conditions, as well as secure protection against glare and annoying reflections.

Interchangeable lenses

Interchangeable lenses guarantee uncomplicated handling and perfect visibility in all weather conditions.

Robust and scratch-proof

Made of extremely durable polycarbonate, the lenses withstand temperatures down to –40 °C without compromising mechanical strength. A special coating to protect against damage according to standard EN ISO 12312-1 makes the lenses scratch-resistant without impairing the view.

Soft nose pads and earpiece ends

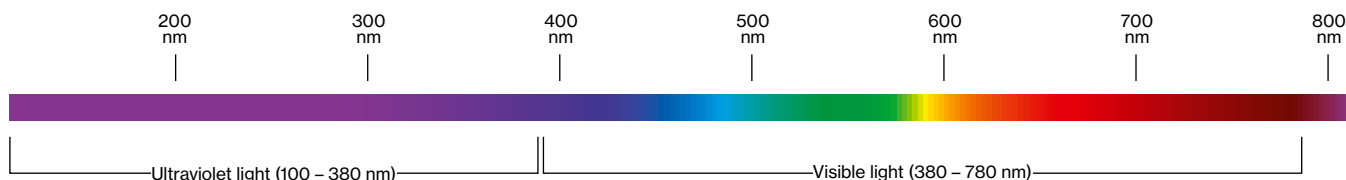

A pair of glasses fits perfectly when you cannot feel them. Soft nose pads and soft earpiece ends ensure pressure-free wearing comfort. The soft earpieces are cold-formable on a variety of models. They ensure a perfectly secure fit.

UV protection

Ultraviolet absorbers integrated directly into the raw material filter 100% of harmful UVA, UVB, and UVC radiation up to 400 nm.

European standard for sports eyewear and goggles

EN ISO 18527-1:2022 / EN ISO 18527-1

100 % UV protection up to 400 nm

Our UV absorber offers 100% protection against damaging UV rays up to 400 nm.
