# made2perform

Biniam Girmay, ERI,  
Team Intermarché-Wanty

**uvex is performance.**

made2perform is our pledge to design and manufacture products that deliver exceptional performance without compromising on safety, comfort, quality or sustainability. Products that perform – from the workplace through to the world of sports and leisure.

uvex stands for passion, motivation, and excellence. “made2perform” is a motivating force for our customers, athletes, uvex employees, and all those who aspire to the winner’s podium.

# protecting people since 1926

**Professional or recreational. Competition or fun. As one of the leading international manufacturers of protective products with headquarters in Fuerth, we at uvex inspire our customers every day with groundbreaking technologies and innovative products. 24/7 – since 1926. To achieve the best, whether in leisure, sports or work. To protect people.**

**“A helmet should do one thing: protect your head. And I think our uvex helmets do a good job safety wise. This really is the major point in my opinion. But I also do love the design. Our uvex surge aero MIPS helmet with aero cover is pretty light for an aero helmet, that is why I chose to wear it for Paris-Roubaix.”**

**made in uvex –  
made 2 perform  
innovative. protection.  
sustainable.**

First-rate engineering. Backed by years of expertise. Passionate about quality. “made in uvex” is more than a simple promise. It embodies our accumulated expertise in product design and innovation – since 1926. Our highly qualified team of design, development, and product management experts creates products with standard-setting performance, safety and durability. Our product development is based on extensive laboratory tests, toxic substance controls, computer simulation, and actual field tests with professional athletes. During the manufacturing phase, premium workmanship and environmental responsibility go hand in hand. “made in uvex” is our quality pledge. And our benchmark for outstanding performance coupled with ultimate protection.

#### Winning innovation

Cutting-edge development. Longstanding product expertise. Maximum safety. The uvex name has been synonymous with innovative products for almost 100 years. We surpass industry standards. We perfect and finetune our sports equipment through rigorous lab tests and field tests, and by using pioneering computer simulation.

#### Winning performance

Multiple test winners. Full confidence. Absolute dependability. Developed by expert engineers, tested by professional athletes. Our helmets, eyewear, and protective equipment meet the highest standards in safety and reliability. "made in uvex" quality – outstanding performance for every application.

#### Winning design

Perfect functionality. Top performance. Stylish looks. In our HQ at Fürth, the design team sets new standards. Our helmets and eyewear are not only highly protective and highly durable – they are also trendsetting, statement pieces. Product design that's visually and technically outstanding.

#### Winning sustainability

Eco-friendly materials. Fair working conditions. Our vision of sustainability is clear. Responsible, innovative and progressive technologies. Sustainable raw materials and minimised CO<sub>2</sub> emissions. A conscientious approach to the environment and our employees. These are the three pillars of our 'Protecting Planet' strategy. Our goal is to be climate neutral by 2045. It may sound a long way off, but for the plastics industry it's an ambitious target. It's a challenge that spurs us on. Because that's who we are.

# uvex ultimate surge carbon MIPS

High speed. High tech. High end. The uvex ultimate surge carbon MIPS is the no-compromise solution for modern professional road cycling. 100 years of know-how, racing DNA and precision engineering have all been ploughed into this helmet – made for absolute peak performance. Built around an ultralightweight multi inmould construction with an ultralight carbon outer shell for the highest stability at the lowest weight. The Mips® Air Node safety system adds an extra level of protection for the skull and brain. The helmet's aerodynamic shape – refined through CFD simulation – noticeably reduces

wind drag, while ventilation channels give it effective air circulation. And the fit is adjusted using the uvex 3D IAS Pro system, with precise height and circumference tuning, and ultralight straps with Y-shaped dividers.

uvex ultimate surge carbon MIPS – ultimate performance, made for you.

Page 17

# CCubed® cooling effect – a cool head when the competition heats up.

Inside, the exclusive new CCubed® cooling effect padding, developed in collaboration with uvex, provides revolutionary levels of moisture management and breathability that generates a cooling effect – no matter how hot the competition.

But how does it work? Instead of polyurethane, we've used a fibre-based PET material that produces a capillary effect. Sweat is instantly wicked away from the skin to the dry part of the padding, where it can evaporate, creating a natural cooling effect. This generates noticeably improved comfort, especially when pushing hard.

Three key benefits:

- 1. Temperature regulation:** The evaporation effect lowers the surface temperature of the head – by up to 2°C according to tests. Protects from overheating, for a fresher more energetic feel, and longer-lasting performance.
- 2. Effective moisture management:** No more sweat getting into your eyes or down your glasses. The padding quickly absorbs perspiration – for clear vision on strenuous climbs.
- 3. Sustainability:** The padding is made from a recycled mono-material – and is therefore fully recyclable. For a clear head. And a cleaner planet.

Sweat smart. Stay cool.

# uvex i-vo 2 – every ride. every style.

Countless demands. Countless uses. One helmet series. The next generation of the uvex i-vo 2 family – using the latest technologies, in new designs, with proven uvex comfort, and even more options. From your daily commute to your training missions. There's a uvex i-vo 2 that fits the bill.

# junior & kids

# uvex i-vo 2 – legendary bike helmet, in five new styles.

The legendary uvex i-vo family has expanded – with five different helmets. For every ride. The uvex air wing 2 is a helmet for junior everyday heroes: comfortable, secure, child friendly. If racing is your thing, the uvex i-volute is for you: ultra-lightweight and fully ventilated. And it comes in a MIPS version for added protection. For commuting or riding the city streets, the uvex city i-vo 2 – with or without MIPS® safety system – with LED light and reflectors for maximum visibility. The uvex i-vo 2 and uvex i-vo 2 MIPS are versatile, robust, comfortable and suited to touring. Or the uvex i-vo 2 pure: focussed on the essentials. Five helmets. Different styles. All with uvex quality guaranteed.

### ultimate protection. ultimate breathability. ultimate line.

Focus. Attack. Victory. The uvex ultimate surge carbon MIPS: A high-end racing helmet that combines an aerodynamic high-tech shape with ultralight carbon power, Mips® Air Node system, and innovative CCubed® cooling effect lining. For maximum performance, when every Watt counts.

- Reliable protection: ultralight yet tough carbon multi inmould technology plus built-in Mips® Air Node safety system. TÜV Rheinland certified according to EN 1078:2012 and A1:2012
- Aerodynamic design: optimised helmet construction
- Secure fit: easy-adjust straps with Y-shaped dividers, uvex 3D IAS Pro system for quick and precise height and circumference adjustment, and lightweight SNAP buckle closure
- Superior comfort: innovative CCubed™ cooling effect lining, developed together with uvex, features revolutionary moisture management and breathable cooling effect
- Lightweight: three sizes 53–56, 56–59, 59–61 cm; weighing just 250 g (size M)

### functional. reinforced. fitted.

Hop on. Get rolling. Chew the miles. The uvex i-volute MIPS is the ideal starter helmet for road cycling and gravel riding – with Mips® safety system for added protection, a lightweight double inmould design, and superior fit thanks to the uvex 3D IAS system.

- Reliable protection: the inseparable connection between the shock-absorbing EPS inner layer and the multiple polycarbonate shell layers offers high impact protection and reduced weight
- Improved safety: built-in Mips® safety system helps absorb rotational impact forces during a fall
- Superior wear comfort: four sizes 50–54, 52–57, 56–60, 60–64 cm, active ventilation system throughout with multiple vents and vent screens, removable washable lining made from recycled materials
- Comfortable fit: uvex 3D IAS system for precise height and circumference adjustment
- Secure fit: flat-format straps with Y-shaped dividers for reduced wind drag

### see. be seen. stay safe.

Commuting. Cruising. Shopping. Whatever today's plans are, the uvex city i-vo 2 MIPS is ready to go. With Mips® safety system, reflective detailing, rechargeable LED light and a snug, comfortable fit for your everyday cycling needs.

- Reliable protection: the inseparable connection between the shock-absorbing EPS inner layer and the multiple polycarbonate shell layers offers high impact protection and reduced weight
- Improved safety: built-in Mips® safety system helps absorb rotational impact forces during a fall
- Superior wear comfort: three sizes 52–57, 56–60, 60–64 cm, active ventilation system throughout with multiple vents and vent screens, removable washable lining made from recycled materials, uvex 3D IAS system for quick and precise height and circumference adjustment
- Good visibility: rechargeable plug-in LED light on the back of the helmet (3 flashing modes), reflective straps, logos and stickers
- Secure fit: easy-adjust straps with Y-shaped dividers

## Specials

**extra style. extra safety. extra MIPS.**

More protection. More style. No compromise. The uvex kid 4 style MIPS brings together popular designs with the Mips® safety system – for smart safety in the streets.

- Improved safety: built-in Mips® safety system helps absorb rotational impact forces during a fall
- Superior wear comfort: two sizes 51-55, 55-58 cm, active ventilation system throughout with multiple vents, removable washable lining and padded chin buckle
- Easy handling: uvex monomatic buckle and patent pending uvex IAS system with adjustment limiter
- Good visibility: reflective straps and rear light slot
- Safely stowed: docking slot for Hiplik Z LOK security tie

## Specials

### my helmet. my style. my adventure.

Put it on. Stand out. Head out. The uvex kid 4 style: for a splash of colour in the city. With a tough hardshell, fun urban-themed designs and reliable protection – for active kids with their own sense of style.

- Reliable protection: tough ABS hardshell with EPS inner shell for extreme impact resistance and effective shock absorption. TÜV Rheinland certified according to EN 1078:2012 and A1:2012
- Superior wear comfort: two sizes 51-55, 55-58 cm, active ventilation system throughout with multiple vents, removable washable lining and padded chin buckle
- Easy handling: uvex monomatic buckle and patent pending uvex IAS system with adjustment limiter
- Good visibility: reflective straps and rear light slot
- Safely stowed: docking slot for Hiplot Z LOK security tie

# uvex air wing 2 cc

order here

## Views

## Specials

### pedal power. high gear. full speed ahead.

Whether it's the road to school, the playground or a little tour, the uvex air wing 2 cc is light, fits well, and protects their heads with its tough inmould construction, uvex 3D IAS system and child-friendly handling.

- Reliable protection: the inseparable connection between the recycled shock-absorbing EPS inner layer and polycarbonate outer layer offers high impact protection and reduced weight
- Superior wear comfort: two sizes 50–54, 52–57 cm, active ventilation system throughout with multiple vents and vent screens, removable washable lining, uvex 3D IAS system for quick and precise height and circumference adjustment
- Good visibility: optional plug-in LED light
- Secure fit: easy-adjust straps with Y-shaped dividers
- Easy handling: uvex monomatic buckle

# uvex oyo super-cute. super-safe.

This kids' helmet goes further. With child-friendly operation and the uvex xTRA Shield forehead protection. New functions include ventilation, a LED and an additional uvex KID PROtect Pad for the back of the head. In short: perfect protection, whether they're in a child seat, on a balance bike or pedalling off to their first bike adventures.

Want to get it right and learn how to adjust the uvex oyo Kids' bike helmet correctly? Just scan the QR code and watch the how-to video!

# tech summary

## Tested to standards

Anyone riding with uvex bike helmets rides on the safe side. Because every one of our bike helmets undergoes tough tests in the uvex testing center.

Additionally GS-tested

The voluntary test mark "GS" stands for "Geprüfte Sicherheit" ("tested safety"). Find details about test criteria: [www.tuv.com](http://www.tuv.com)

European standard for cycling helmet, downhill skiing and snowboarding goggles

**EN 1078:2012+A1 2012** **CE**  
**EN ISO 18527-1:2022 /**  
**EN ISO 18527-1**

## US Norm ASTM F1952-15

## Shell materials

**PC**  
**inmould // double inmould // multi-inmould**  
 Safety thanks to the strongly bonded PC shell. Double inmould for extra protection along the lower edge.

**ABS**  
**hardshell**  
 Proven technology has a hard shell for highly effective protection.

**EPS**  
**hardshell // inmould**  
 The protective material comprises microscopically small air chambers that act as shock absorbers for the impact created by a crash.

## Shell constructions

**Hardshell**  
 The helmet has a molded outer shell and EPS inner shell for the most efficient safety combination: impact resistant on the outside, shock-absorbing on

the inside. This complex construction allows perfectly placed air vents and channels to be built in, for exceptional wearing comfort.

**Inmould**  
 The protective EPS is injected directly into the polycarbonate shell. This ensures a lightweight helmet construction with the highest impact resistance and perfect bonding between the EPS inner layer and the PC outer layer.

**Double inmould // multi-inmould**  
 The proven inmould construction is fitted with a second or several PC shell(s). It gives extra protection to the outer edge from damage.

## Visor types

**Light conditions**

**low light**

**fairly sunny / sunny**

**Filter category**  
**Translucency level**

**cat. 0**  
**80–100%**

**cat. 1–2**  
**18–80%**

**mirror / litemirror**

pink (cat. 1)  
 silver (cat. 1)

**basic**

clear (cat. 0)

**Fit**

**MIPS**

An angled impact generates rotational movements that can cause serious injuries. The MIPS system can reduce the rotational movements and thus reduce the risk of brain damage.

**FAS**

Fast Adapting System straps can be easily and continuously tailored to fit your precise head shape.

**MIPS + height adjustment**

The added height adjustment into the MIPS layer provides even more safety and comfort.

**Monomatic**

The uvex monomatic comfort fastener can be opened and closed with just one hand.

**AIR  
NODE**

**MIPS Air Node**

Lightest MIPS system that replaces the interior – Less weight, better ventilation MIPS Air Node is designed to reduce rotational forces acting on the head in certain cases of oblique impact.

**Shell sizes**

Perfect fit = head size and head shape. The uvex range has the perfect shell size for every head, whether large, small, round or angular, from 45 cm to 65 cm.

**Comfort**

**Vent systems**

uvex places the highest value on optimal ventilation. Cleverly designed ventilation openings draw fresh air in and expel warm air.

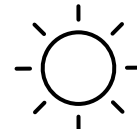

**ccubed**

Innovative interior that absorbs perspiration during the ride and effectively wicks it away. The moisture is released into the air flowing past: The evaporation effect lowers the temperature on the surface of the skin by up to 2 degrees Celsius.

**sunny**

**cat. 3**  
**8-18 %**

**glare\***

**cat. 4**  
**3-8 %**
