made2perform

uvex is performance.

made2perform is our pledge to design and manufacture products that deliver exceptional performance without compromising on safety, comfort, quality or sustainability. Products that perform – from the workplace through to the world of sports and leisure.

uvex stands for passion, motivation, and excellence. “made2perform” is a motivating force for our customers, athletes, uvex employees, and all those who aspire to the winner’s podium.

uvex

protecting people since 1926

**Professional or recreational. Competition or fun.
As one of the leading international manufacturers
of protective products with headquarters in Fuerth,
we at uvex inspire our customers every day with
groundbreaking technologies and innovative products.
24/7 – since 1926. To achieve the best, whether
in leisure, sports or work. To protect people.**

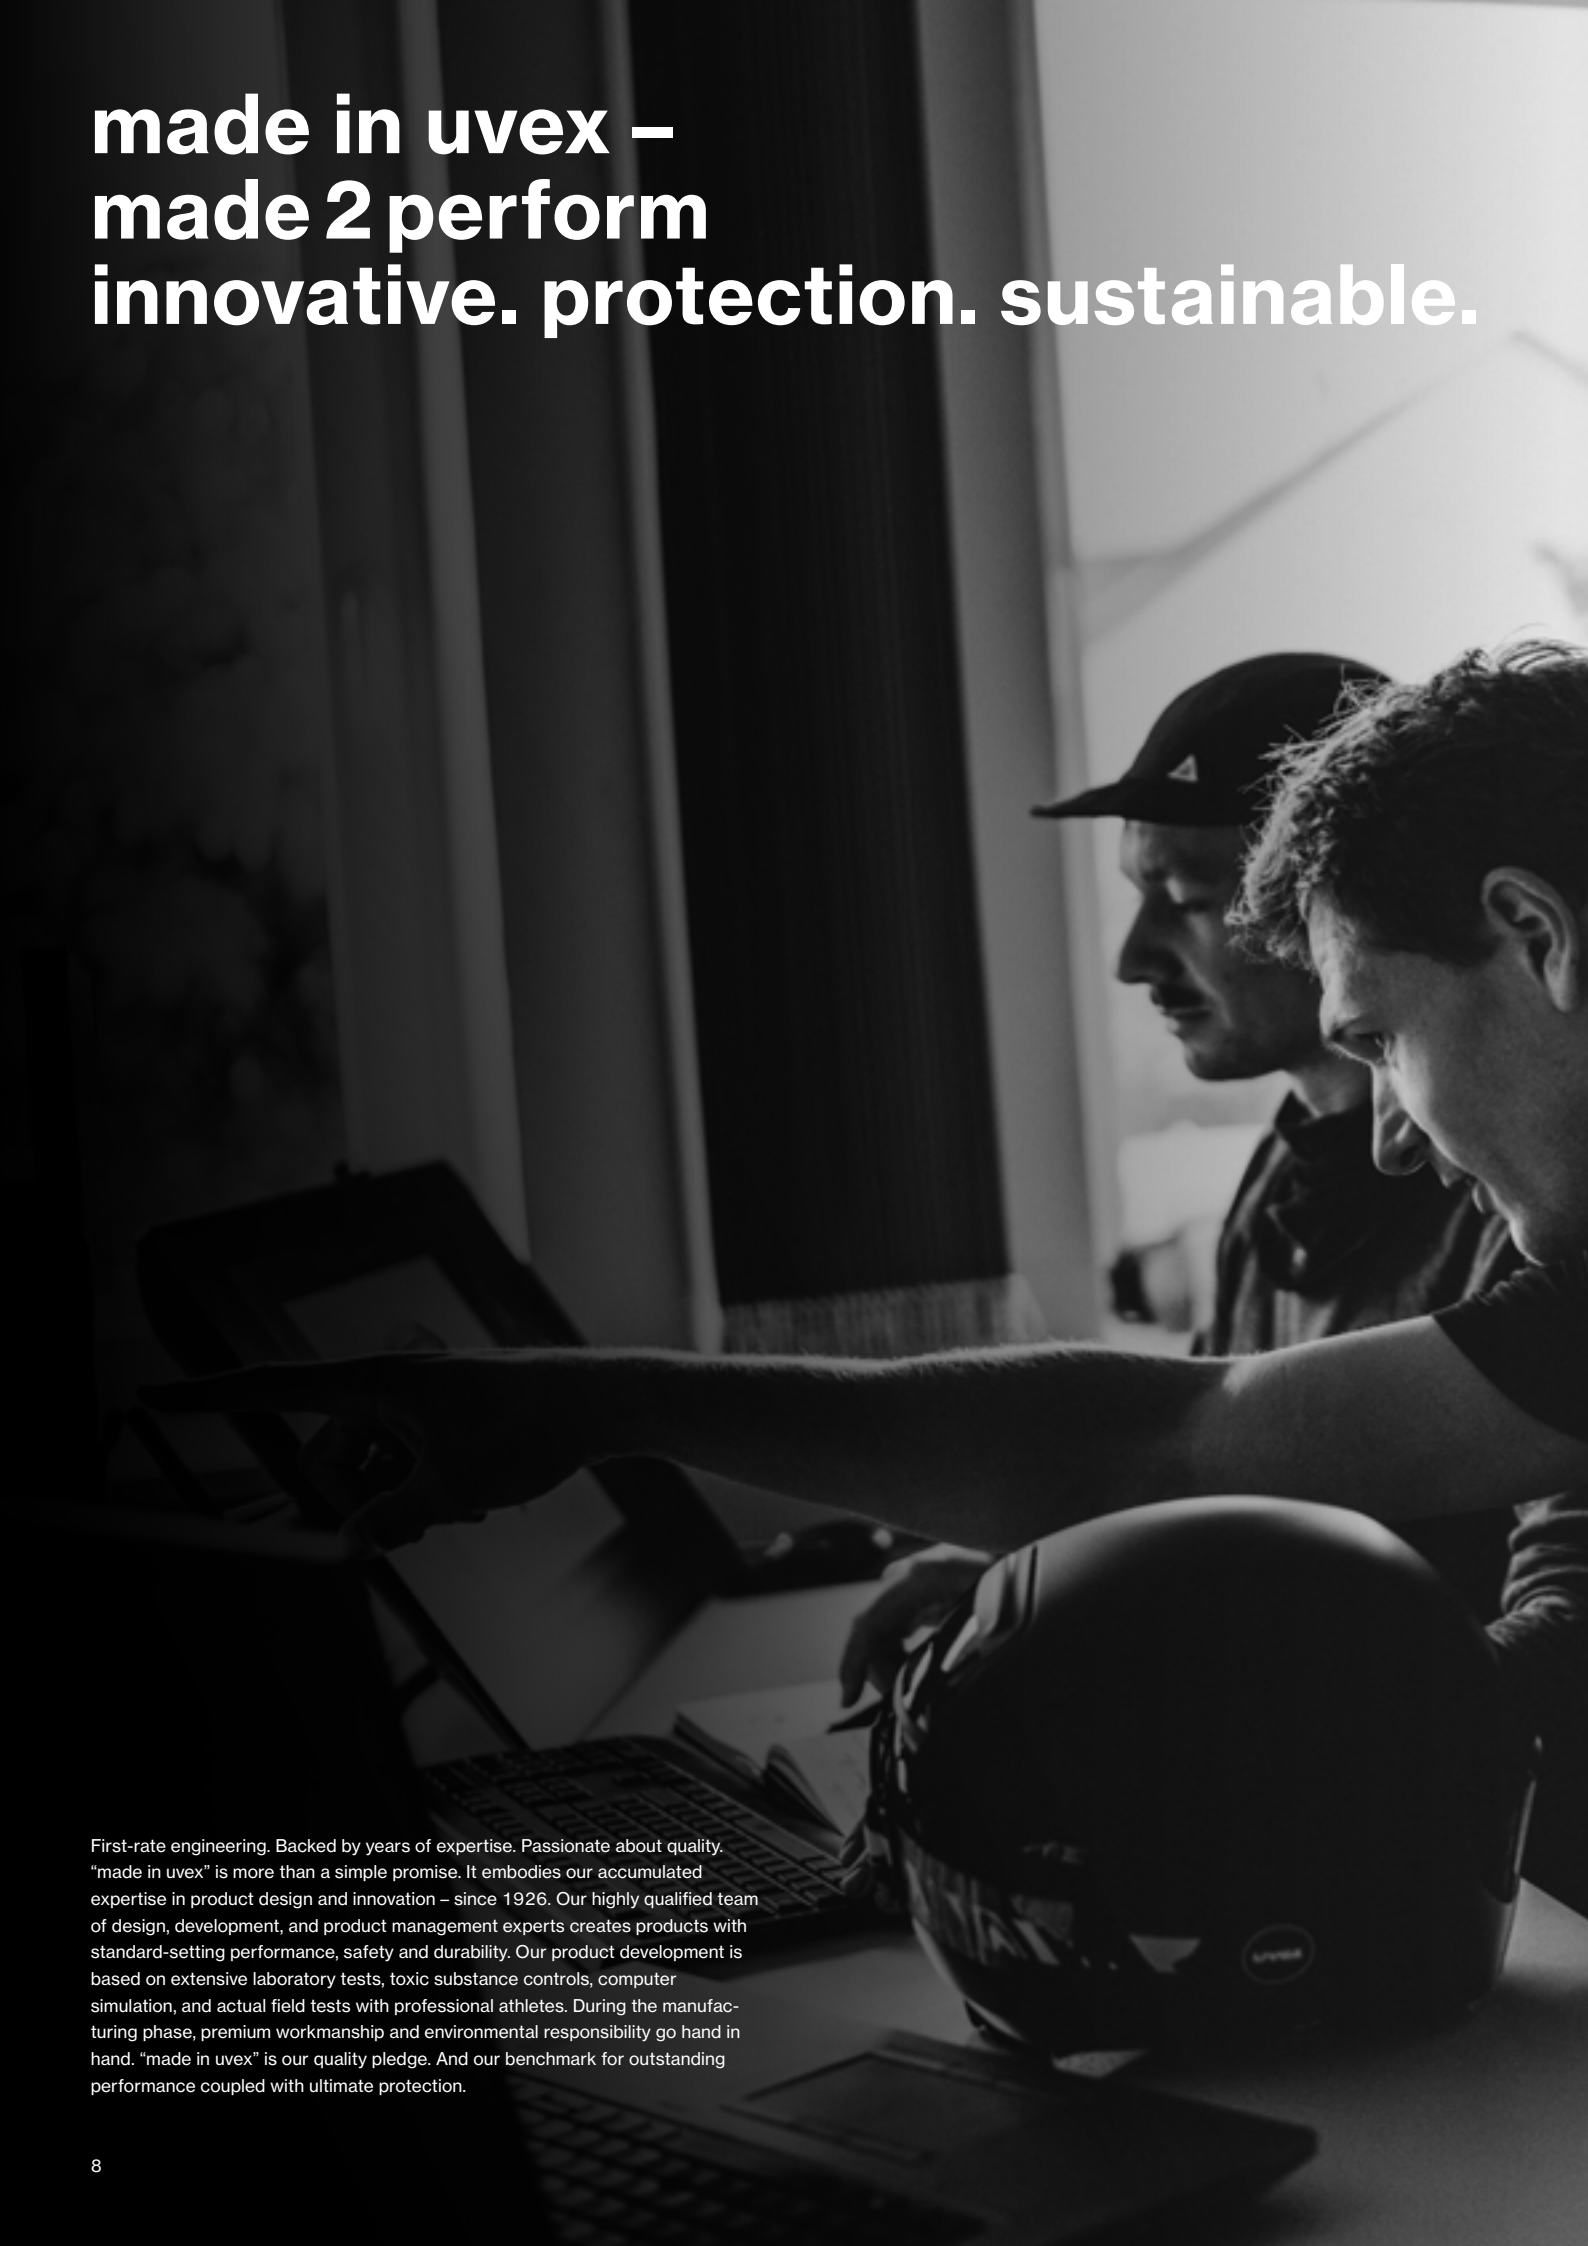

“In the World Cup, I rely on absolute precision – both in my equipment and my protective gear. uvex helmets and goggles give me the confidence to always push myself to the limit.”

Linus Strasser, GER

**made in uvex –
made 2 perform
innovative. protection. sustainable.**

First-rate engineering. Backed by years of expertise. Passionate about quality. "made in uvex" is more than a simple promise. It embodies our accumulated expertise in product design and innovation – since 1926. Our highly qualified team of design, development, and product management experts creates products with standard-setting performance, safety and durability. Our product development is based on extensive laboratory tests, toxic substance controls, computer simulation, and actual field tests with professional athletes. During the manufacturing phase, premium workmanship and environmental responsibility go hand in hand. "made in uvex" is our quality pledge. And our benchmark for outstanding performance coupled with ultimate protection.

Winning innovation

Cutting-edge development. Longstanding product expertise. Maximum safety. The uvex name has been synonymous with innovative products for 100 years. We surpass industry standards. We perfect and finetune our sports equipment through rigorous lab tests and field tests, and by using pioneering computer simulation.

Winning performance

Multiple test winners. Full confidence. Absolute dependability. Developed by expert engineers, tested by professional athletes. Our helmets, eyewear, and protective equipment meet the highest standards in safety and reliability. "made in uvex" quality—outstanding performance for every application.

Winning design

Perfected functionality. Top performance. Stylish looks. In our HQ at Fuerth, the design team sets new standards. Our helmets and eyewear are not only highly protective and highly durable—they are also trendsetting, statement pieces. Product design that's visually and technically outstanding.

Winning sustainability

Responsible, innovative and future-driven technologies. Sustainable raw materials and minimal CO₂ emissions. Maximum commitment—to the planet and to our employees. That's the essence of our Protecting Planet strategy. Our goal: climate neutrality by 2045. A bold ambition in the plastics industry. But we thrive on challenges. They push us further. And the results speak for themselves: For our consistent commitment to circular economy principles and the smart use of resource-efficient materials, the uvex group has been awarded with the German Sustainability Award 2026 in the Plastics & Rubber Industry category.

uvex ultimate horizon MIPS

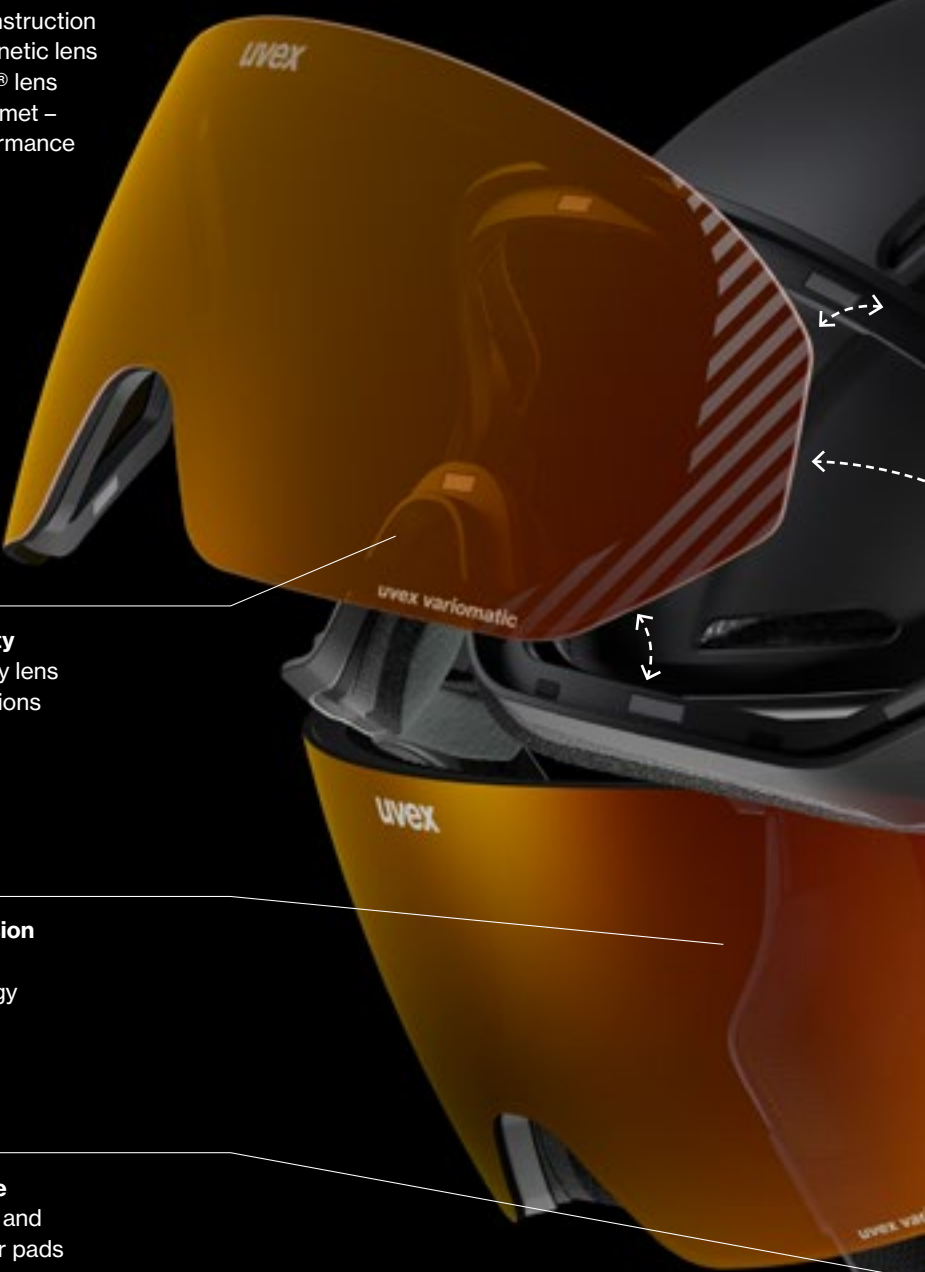

ultimate protection.

ultimate vision. ultimate line.

Safe. Versatile. Outstanding. Tough hybrid helmet construction with built-in Mips® safety system combined with magnetic lens changing technology and self-tinting uvex variomatic® lens technology. The outcome: a next-generation visor helmet – uvex ultimate horizon MIPS for no-compromise performance on the pistes.

**tough protection. pure joy.
popping colours.**

- Reliable protection: tough ABS hardshell with EPS inner shell for extreme impact resistance and effective shock absorption, with TÜV Rheinland certification according to EN 1077:2007, class B rated
- Superior wear comfort: two sizes 48–52, 51–55 cm, ventilation system throughout and removable washable lining
- Easy handling: uvex monomatic buckle and uvex IAS system with adjustment limiter
- Durable: scratchproof material, tough PC edging and shatterproof built-in goggles clip

lens tech. everything in view – whatever the conditions.

The uvex brand's DNA is embedded in our ski goggles – especially our leading lens technologies. All made possible by our inhouse engineering and our own production facilities. uvex colorvision® (CV) delivers ultimate contrast and maximum colour perception – even when visibility is very poor. The self-tinting uvex variomatic® lenses adapt from light to dark in a few seconds – as soon as the light conditions change. Ski goggles with uvex polavision® give you reliable protection from glare and reflections that can affect your visibility on the mountain. The uvex supravision® coating technology, available for all uvex ski goggles, ensures you have fog-free and accurate vision.

#made2perform

**uvex colorvision® (CV):
wow effect included**

- Ultimate contrast enhancement
- Maximum colour perception
- 100 % UVA, UVB, UVC protection up to 400nm

**uvex polavision® (P):
less glare, more joy**

- Fewer distracting reflections
- Minimized glare reduces eye strain
- Better detail vision, even in difficult light conditions

V

**uvex variomatic® (V):
top-flight comfort**

- Automatic, stepless self-tinting
- **NEW: Five protection levels (S0-S4)**
- From light to dark in 25 seconds

S

**uvex supravision®:
unequaled anti-fog performance**

- 200 % more anti-fog (vs. standard)
- 100 % UVA, UVB, UVC protection up to 400 nm
- Unbreakable for maximum protection

uvex colorvision® sharpen your vision.

Meet uvex colorvision® (CV). A synonym for the highest level of contrast between bright colours – regardless of locations and conditions. On the piste, in deep snow, on demanding tours. Plus: stronger depth perception if visibility gets low. Ensures better performance and maximum safety. Always. Everywhere.

- Ultimate contrast enhancement
- Maximum colour perception
- 100 % UVA, UVB, UVC protection up to 400 nm
- 15 % wider field of vision

tech summary helmets

Tested for safety

Ski helmet standard
EN 1077:2007

Bicycle helmet standards
EN 1078:2012 + A1:2012

Also GS tested

The voluntary certification mark "GS" stands for "Geprüfte Sicherheit" ("tested safety"). More details on the test criteria are available at: www.uvex-sports.com/ce

Shell technologies

hardshell

A highly effective combination of an injection-molded outer shell and an EPS inner shell, making it:

- Robust
- Highly impact-resistant
- Shock-absorbent
- Insulated against cold

inmould

The EPS is injected directly into the polycarbonate shell to make it:

- Light
- Impact-resistant

hybrid-technology

The robust hardshell on the upper part of the helmet is bonded to the lower part using the Inmould process for:

- Perfect ventilation
- Impact resistance
- Optimal fusion of the hardshell and inmould technology

+technology

Innovative and very light special polymer.

Shell material

Polycarbonate

inmould

Protective as the PC layer is firmly bonded to the EPS layer

CFK

hardshell

Polymer reinforced with carbon fiber used in high-end and lightweight helmets

ABS

hardshell

Ultra-effective protection and maximum robustness

EPS

hardshell // inmould // hybrid

Protective material comprising microscopically small air cells that absorb the force of an impact

Comfort

hear+-technology

Ear pads with hear+-technology generate improved ambient sound perception and outstanding acoustics.

Fit

Monomatic

The uvex monomatic comfort fastener can be opened and closed with just one hand.

Protective systems

MIPS

The Multi-Directional Impact Protection System (MIPS) protects the brain against rotational movements that can be very dangerous in case of an impact to the head.

FIDLOCK

The FIDLOCK magnetic buckle uses magnets for one-handed operation, even when wearing gloves.

vision+

vision+ lenses offer ultra-wide field of vision for unrestricted panoramic vision.

Fit adjustment systems

Comfort features	IAS Optimal width adjustment with an ergonomic dial system	3D IAS Optimal width and height adjustment with an ergonomic dial system	360° IAS Precise 360° fit system for full comfort	IAS auto stop with adjustment limiter

tech summary goggles

Lens technology

uvex colorvision® (CV)

These tinted uvex colorvision® lenses with a +15 % bigger field of vision deliver maximum contrast enhancement for single lenses and +400 % anti-fog effect compared to the standard.

uvex colorvision® green

Green is the variant for good weather and the perfect choice when it's sunny or slightly cloudy.

uvex colorvision® orange

Orange is a universal all-rounder and suitable for any weather.

uvex colorvision® yellow

Yellow works hard when it's cloudy or snowing, providing the best possible vision in difficult visibility conditions.

uvex colorvision® purple

Purple power – popping contrast in changeable terrain and wide-ranging light conditions.

uvex supravision®

This uvex core technology proved in tests that it offers 200 % more anti-fog compared to the standard and stays fog-free up to 60 seconds: precise vision and maximum protection. Includes 100 % UVA, UVB and UVC protection up to 400 nm.

uvex variomatic® (V)

The automatic and stepless self-tinting, from light to dark in 25 seconds, combines five protection levels (S0–4, S0–2 and S1–3) and uvex supravision® anti-fog coating in one product. Plus: the lenses offer 100 % UVA, UVB and UVC protection.

uvex polavision® (P)

uvex polavision® absorbs scattered light and gives reliable protection against reflections and glare. Prevents eye strain, even in demanding conditions.

uvex ATTRACT tec

The uvex ATTRACT tec magnetic interchangeable lens technology for fast lens changes in just one click.

Ski goggle protection

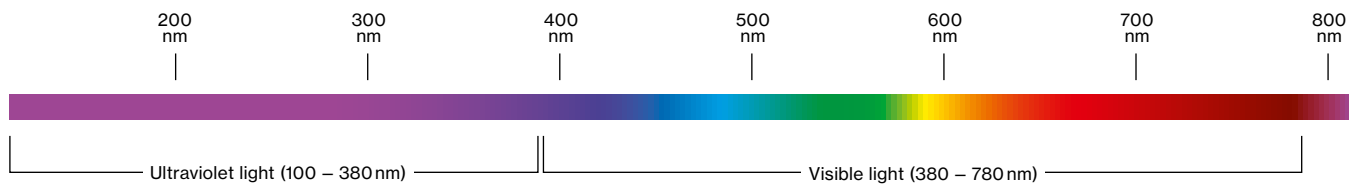

Crack-resistant

NORM: EN 174:2001

Tested with the demanding impact test. Further information in the uvex Techbook.

Scratch-resistant

Ultra-robust polycarbonate lenses resist sub-zero temperatures without compromising their strength. A special coating protects them from scratches. Further information in the uvex Techbook.

100 % UV protection up to 400 nm

Our UV absorber offers 100 % protection against damaging UV rays up to 400 nm (380 nm).

tech summary eyewear

Lens technology

uvex colorvision®

The four innovative uvex colorvision® tints provide ultimate contrast and perfect vision – with a matching lens for every situation.

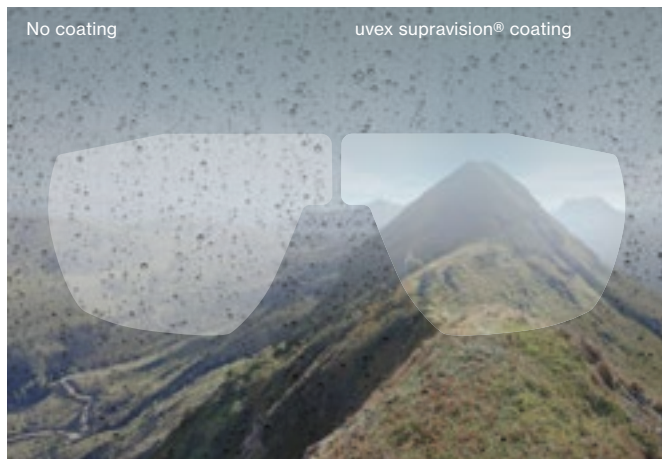

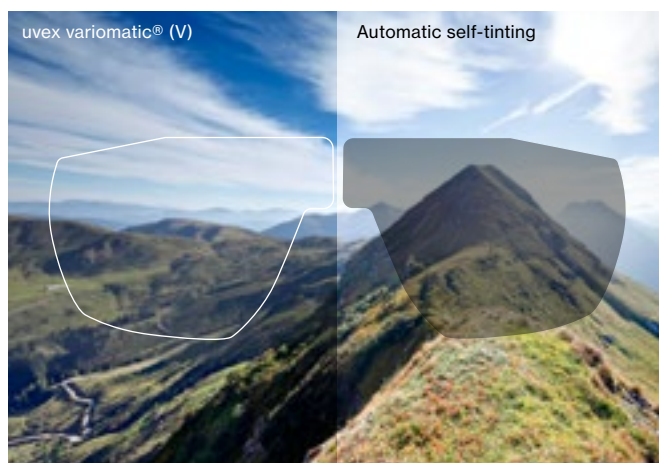

- Ultimate contrast enhancement
- Maximum color perception
- 100 % UVA, UVB, UVC protection up to 400 nm

uvex variomatic®

Eyewear with uvex variomatic® automatically reacts to the natural light conditions.

- Automatic, stepless self-tinting
- From light to dark in 25 seconds
- Three levels of protection in one lens (cat. 1–3)
- 100 % UVA, UVB, UVC protection up to 400 nm

uvex supravision®

The uvex supravision® coating ensures fog-free vision without affecting the optical quality of the lens. It remains fog-free for twice as long as specified by the standard.

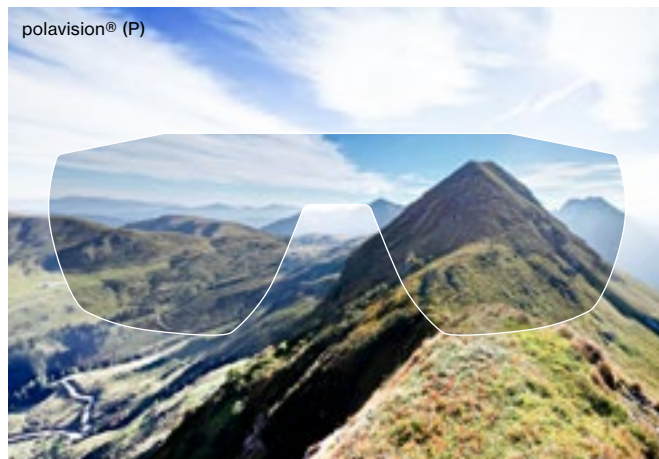

- 200 % more anti-fog (vs. standard)
- Break-resistant for maximum protection
- 100 % UVA, UVB, UVC protection up to 400 nm

uvex polavision®

Reliable protection against reflections and glare: the lenses of the uvex polavision® series absorb diffused light and reliably protect the eyes from overexertion.

- Polarizing lenses against annoying reflections
- Reduce stray light and glare
- For a comfortable viewing experience

uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: lens tinting and contrast enhancement – in a single, innovative uvex lens. Made for sports activities in any weather and any environment.

Decentered lens technology

Distortions and curvatures in the field of view can quickly lead to irritation. uvex therefore uses grade 1 decentered lenses, which allow a distortion-free view.

Direct lens ventilation

The uvex temperature competence ensures permanent, draft-free ventilation. This keeps the field of view fog-free twice as long as conventional standards demand.

Easy to clean

The special coating on the lens allows moisture or fingerprints to be easily removed.

VPX

uvex sunglasses with variomatic polavision extended technology (VPX) – featuring automatic, stepless self-tinting in all light conditions, as well as secure protection against glare and annoying reflections.

Interchangeable lenses

Interchangeable lenses guarantee uncomplicated handling and perfect visibility in all weather conditions.

Robust and scratch-proof

Made of extremely durable polycarbonate, the lenses withstand temperatures down to –40 °C without compromising mechanical strength. A special coating to protect against damage according to standard ISO 12312-3:2022 makes the lenses scratch-resistant without impairing the view.

Soft nose pads and earpiece ends

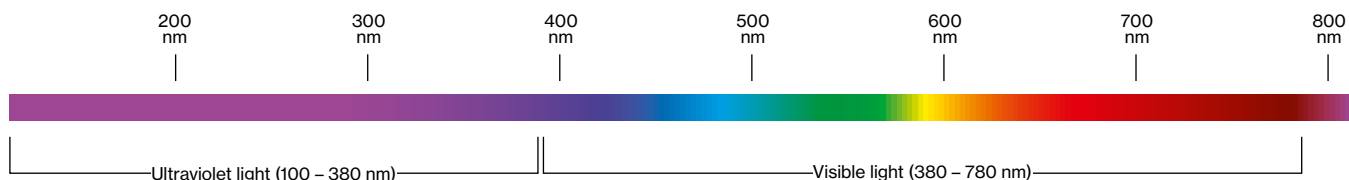

A pair of glasses fits perfectly when you cannot feel them. Soft nose pads and soft earpiece ends ensure pressure-free wearing comfort. The soft earpieces are cold-formable on a variety of models. They ensure a perfectly secure fit.

UV protection

Ultraviolet absorbers integrated directly into the raw material filter 100% of harmful UVA, UVB, and UVC radiation up to 400 nm.

European standard for sports eyewear and goggles

ISO 12312-3:2022

100 % UV protection up to 400 nm

Our UV absorber offers 100 % protection against damaging UV rays up to 400 nm (380 nm).
