Men's cycling jackets

Women's cycling shorts

Women's cycling jerseys

Women's cycling jackets

Colorways

Gonso Giro Gelato –

a collection that reimagines summer: light, playful, and full of joie de vivre. Inspired by the lightness of Italian days, by warm light on the skin, short breaks on the roadside, and the simple happiness of being on the move. Dolce Vita, translated into movement.

The color palette consciously picks up on this mood: high-quality, summery colors that reflect the style and joie de vivre of Italy – harmoniously coordinated and modernly interpreted.

New items in all segments expand the collection: from fresh High Summer Road jerseys to new color worlds and a completely revised mountain bike collection. Developed for maximum freedom of movement, high wearing comfort, and a riding experience as light as a summer day.

ride better.

On the trail of the essential

We stay up to date, but we don't chase every trend. Everything that gets in the way of the pure riding experience is consistently omitted. The reduction to the essentials is reflected in the design of our collections, in our communication, and in our appearance.

For the love of cycling

The enthusiasm for cycling connects us. We support each other and drive Gonso forward together as a team. Each and every one of us identifies with the brand and rides with it ourselves.

The Gonso Method

For us at Gonso, cycling shorts are only finished when they fit perfectly in all sizes – even if the path to get there is longer and harder. We use every piece of feedback as inspiration.

We test, revise, redevelop. Every idea inspires us to become even better. So that every pair of Gonso cycling shorts you buy is your best one.

At the beginning is the idea. We combine market research with our own experiences and customer feedback. This is how the first product idea is born.

Once the product concept is set, high-quality materials and suitable components are selected. First sketches are created.

In addition, a modern color concept is developed for the new collection.

“Every pair of cycling shorts must be individually graded, developed, and fitted. We don’t do run-of-the-mill cuts.”

Heike Schönemann, Pattern Technician

For an optimal fit, every trouser model is first broken down into complementary individual parts during pattern creation.

The first prototype is created from the individual elements. It is used to optimize the cut and fit.

Because we fit our prototypes on real people instead of mannequins, we can respond more specifically to body shapes and how they change during movement.

Starting from the base size, size scaling is carried out depending on the product and body area. Through non-linear scaling of size increments, suitable products are created in every size. Then the production process begins.

Cycling Shorts

The perfect cycling shorts for every use.

SQLab^{Go}

Premium Fabric

Unique elasticity, super soft wearing comfort and a surface with optimal breathability and optimal moisture transport.

Orthopaedic TPE gel

Was specially developed to absorb shear forces in the medical field.

Super high density foam

Offers highest density with first-class breathability and simultaneously improved damping properties.

Why haven't firm seat pads existed for longer? Because high-quality foams with better damping properties have a higher density and therefore lose breathability. Firm seat pads

Through a patented process, SQLab has managed to break up the structures of the very dense foam. The result is high breathability, comparable to conventional pads. The perfect cushioning is fully maintained.

Minimization of shear forces

Pain is caused less by the resulting pressure than by the shear forces on the periosteum, which are caused by pedaling movements and the constant movement of the pelvis. SQLab pads M and W contain a thin layer of an orthopedic TPE gel that was specially developed to minimize shear forces in the medical field.

SQlab pad

Innovative SQlab pad with TPE gel, only 6 or 8 mm thin and particularly firm

Features

Particularly wide silicone leg grippers for perfect hold and wearing comfort

Perfect fit

Sporty fit with innovative cut, extra-wide elastic straps for the best hold or comfort waistband

Durable

High-quality and particularly elastic functional material with high compression behavior

The blue Sitivo seat pad is perfect for an upright sitting position.

Sitivo Green

The green Sitivo seat pad is perfect for a compact sitting position

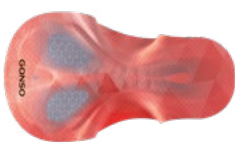

Sitivo Red

The red Sitivo seat pad is perfect for a sporty sitting position.

SQLab Pad

Dry Up

Dry Up Air

Anatomic

Relax Gel Comfort

Density 60 kg/m³
 Pad height 18 mm
 Foaming Soft
 Pad material Foam, Poron®

- Best comfort due to reinforced padding at the rear pressure point
- Shock-absorbing Poron® elements at the rear and front pressure points
- No pressure points, high stability and cushioning, pure cycling pleasure

Density 80 kg/m³
 Pad height 16 mm
 Foaming Medium
 Pad material Foam, Poron®

- Highest comfort due to padding precisely adapted to the entire seating area
- Shock-absorbing Poron® elements on central pressure points
- No pressure points, high stability and cushioning, pure cycling pleasure

Density 90 kg/m³
 Pad height 15 mm
 Foaming Firm
 Padding material Foam, Poron®

- Direct contact, highest stability due to precisely adapted padding
- Shock-absorbing Poron® elements on front pressure point
- No pressure points, high stability and cushioning, pure cycling pleasure

Density 360 kg/m³
 Padding height 6 mm
 Foaming Very firm
 Padding material Foam + TPE shear force gel

- The SQLab pad is a maximum of 6 mm thin and firm
- Adapts to the body shape after increasing mileage and becomes increasingly comfortable
- Reduced shear forces due to a thin layer of medical TPE gel

Density 80 kg/m³
 Padding height 10 mm
 Foaming Medium
 Padding material Foam

- 3D-elastic for best ergonomics
- Pressure and vibration absorbing for maximum comfort and highest enjoyment
- Seamless - no pressure points, for maximum enjoyment

Density 90 kg/m³
 Padding height 10 mm
 Foaming Firm
 Padding material Foam

- Perforations and ventilation channels for optimal thermal regulation
- 3D-elastic for best ergonomics
- Pressure and vibration absorbing for maximum comfort and highest enjoyment

Density 80/120 kg/m³
 Padding height 12 mm
 Foaming Firm
 Padding material Foam

- Recycled outer fabric and support inserts
- ergonomic shape fits against the body
- reduced pressure and numbness, less skin friction

Density 70 kg/m³
 Padding height 8 mm
 Foaming Soft
 Padding material Foam

- Recycled outer fabric
- front insert made of mesh for more ventilation & comfort
- extra soft outer fabric and pre-shaped comfortable edges
